Summary of Module

This module will be delivered in a blended format and is designed for learners with an advanced level of English who wish to build on this, and who need to be able to express complex concepts in English. It is a core module for students studying for a degree in English as a Second Language but may also be taken as an optional module by EU/International students whose first language is not English, and whose level of English meets the module's pre-requisites. It will develop specialist language knowledge and communication skills appropriate to this level, in order to help students increase their English language proficiency and will promote learner autonomy and initiative. In this intensive module, students will be introduced to a range of academic language skills, while extending the skills of listening, speaking.

Throughout the course, grammatical and lexical features of the language will be consolidated in context, and students will be encouraged to independently address gaps in their knowledge via e-learning and guided independent study. Skills will be practised in class through presentations, role plays, pair- and group-work exercises, written assignments and other interactive activities whose topical content will include current affairs and cultural issues; in addition, work-related and workplace opportunities will be explored, where appropriate, to enable learners to develop global citizenship skills and increase cultural awareness, and will foster inclusivity and an appreciation of the wellbeing of others in order to enable students to be ready for work in local and global contexts.
