Summary of Module

This module provides students with an opportunity to undertake a directed creative collaborative group project. The primary purpose of the module is to develop the students' ability to work collaboratively towards a shared goal with students from other specialist strands within the BA Music Industries programme:

- Music Performance
- Music Industries
- Sound Production

Through the completion of this module students will develop and enhance their communication, networking and project management skills whilst applying their existing knowledge and skills in a market-facing project.

The Collaborative Project module will be delivered in Semester 1, providing students with an opportunity to develop their project management skills prior to undertaking the Specialist Industry Project module in Semester 2.

Students will be allocated to a group and asked to respond to a complex creative brief requiring them collectively to:

- Negotiate their roles, responsibilities and agreed outcomes within the group
- Write or select an original piece of music for release
- Record, mix and master it
- Release it on one or more digital platform(s)
- Plan and execute a promotional campaign aimed at an appropriate target market

It is anticipated students will focus primarily on aspects of the project which align with their own specialism, however there is an opportunity for students to develop new skills in other specialist areas through collaborative working.

Learning and Teaching
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours. The module is delivered through a series of lectures, workshops and tutorial activities focussing on a diverse range of creative practices in the music industries, with particular focus on the planning and execution of complex multi-faceted creative projects. A range of specialist workshops focussing on specific specialisms will be facilitated by lecturing staff with input from industry professionals. Individual groups will be supervised and mentored by a named lecturer contact who will facilitate initial group tutorial sessions to support the groups in establishing self-directed group working practices.

Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	**Student Learning Hours** (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	16
Laboratory / Practical Demonstration / Workshop	12
