Module Descriptor

Title	Partial Differential Equations		
Session	2025/26	**Status**	Published
Code	MATH10003	**SCQF Level**	10
Credit Points	20	**ECTS (European Credit Transfer Scheme)**	10
School	**Computing, Engineering and Physical Sciences**		
Module Co-ordinator	Dr Kenneth Nisbet		

Summary of Module

The module covers the solution of first and second order partial differential equations, and their application in commonly occurring problems in science and engineering.

For first order equations, the use of direct integration, separation of variables, Laplace transforms and the method of characteristics as methods of solution are studied, with application in problems involving, for example, advection processes.

For second order equations, the focus of the study is on the main analytic method of solution, i.e. separation of variables. The theory of Fourier series is revisited in this context. Applications to problems involving such as conduction, diffusion and wave propagation are discussed.

In addition to these analytic processes, numerical methods of solution, such as finite difference methods, are discussed together with application in problems such as advection processes. Suitable software is used.

The Graduate Attributes relevant to this module are given below:

- Academic: Critical thinker; Analytical; Inquiring; Knowledgeable; Problem-solver; Digitally literate; Autonomous.
- Personal: Motivated, Creative; Resilient.
- Professional: Research-minded; Ambitious; Driven.

Module Delivery Method	On-Campus[1] ☒	Hybrid[2] ☐	Online[3] ☐	Work -Based Learning[4] ☐
Campuses for Module Delivery	☐ Ayr ☐ Dumfries	☐ Lanarkshire ☐ London ☒ Paisley	☐ Online / Distance Learning ☐ Other (specify)	

Terms for Module Delivery	Term 1	☐	Term 2	☒	Term 3	☐
Long-thin Delivery over more than one Term	Term 1 – Term 2	☐	Term 2 – Term 3	☐	Term 3 – Term 1	☐

Learning Outcomes	
L1	Demonstrate detailed knowledge and understanding of analytic solution methods for first order partial differential equations.
L2	Demonstrate detailed knowledge and understanding of analytic solution methods for second order partial differential equations.
L3	Implement mathematical software to solve partial differential equations in applications, and to interpret the solutions.
L4	
L5	

Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	**During completion of this module, there will be an opportunity to achieve core skills in:**
Knowledge and Understanding (K and U)	**SCQF 10** Demonstrating a detailed knowledge and understanding of important techniques used in solving partial differential equations. Demonstrating critical awareness of established techniques of enquiry in common applications of partial differential equations.
Practice: Applied Knowledge and Understanding	**SCQF 10** Using a range of standard techniques to solve problems at advanced levels, and sometimes in non-routine contexts.

[1] Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

[2] The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

[3] Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

[4] Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

	Conducting defined investigative problems within a mathematically based subject.
Generic Cognitive skills	**SCQF 10** Conceptualising and analysing problems informed by professional and research issues.
Communication, ICT and Numeracy Skills	**Please select SCQF Level** Implementing and interpreting the output from suitable mathematical software. Making formal written presentation(s) based on the output from an investigative problem.
Autonomy, Accountability and Working with Others	**Please select SCQF Level** Exercising independence and initiative in conducting complex activities. Identifying learning needs through reflection based on self, tutor, and peer evaluation of work.

Prerequisites	**Module Code** MATH09002	**Module Title** Differential Equations 2
	Other or equivalent	
Co-requisites	**Module Code**	**Module Title**

Learning and Teaching	
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.	
Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	**Student Learning Hours** (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	24
Tutorial / Synchronous Support Activity	12
Laboratory / Practical Demonstration / Workshop	12
Independent Study	152
Please select	
Please select	
TOTAL	200

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes: "Partial Differential Equations" class notes as published on the University VLE. Suitable bespoke mathematical software. "Applied Partial Differential Equations", J Ockendon.
(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements
In line with the Student Attendance and Engagement Procedure, Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time. **For the purposes of this module, academic engagement equates to the following:** The School of Computing, Engineering and Physical Sciences considers attendance and engagement to mean a commitment to attending, and engaging in, timetabled sessions. You will scan your attendance via the scanners each time you are on-campus and you will login to the VLE several times per week. Where you are unable to attend a timetabled learning session due to illness or other circumstance, you should notify the Programme Leader that you cannot attend. Across the School an 80% attendance threshold is set. If you fall below this, you will be referred to the Student Success Team to see how we can best support your studies.

Equality and Diversity
The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code. Aligned with the University's commitment to equality and diversity, this module supports equality of opportunity for students from all backgrounds and learning needs. Using the VLE, material will be presented electronically in formats that allow flexible access and manipulation of content. This module complies with University regulations and guidance on inclusive learning and teaching practice. This module has computer lab-based teaching and as such you are advised to speak to the Module Co-ordinator to ensure that specialist assistive equipment, support provision and adjustment to assessment practice can be put in place, in accordance with the University's policies and regulations.
(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
