Summary of Module

This flexible, online module introduces you to key concepts and approaches in learning design. The module is practice-based, and you will be encouraged to link the conceptual discussions to your own practice context.

Key topics will include principles and models of learning design, learner engagement and the educator's role in (online) learning.

You are expected to have an on-going teaching commitment throughout the module in order to support its practice-based elements and assessment.

NB Modules have been validated to run in all terms but will usually run only once per session. Please contact the module co-ordinator for more information.

Terms for Module Delivery	Term 1	☒	Term 2	☒	Term 3	☒

[1] Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

[2] The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

[3] Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

[4] Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Learning Outcomes	
L1	Demonstrate critical knowledge and understanding of the theories and principles of learning design.
L2	Design an activity or digital learning resource appropriate for learners in your context.
L3	Justify selected approach to design of activity or digital learning resource.
L4	Use appropriate digital tools and/or other technologies, and resources for learning.
L5	N/A

Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	**During completion of this module, there will be an opportunity to achieve core skills in:**
Knowledge and Understanding (K and U)	**SCQF 11** Demonstrate critical knowledge and understanding of the theories and principles of learning design. Demonstrate critical awareness of current research and scholarship around learning design.
Practice: Applied Knowledge and Understanding	**SCQF 11** Design an activity or digital learning resource appropriate for learners in your context. Apply a wide range of evidence based skills, techniques and practices associated with creating an environment for effective learning for learners in your context.
Generic Cognitive skills	**SCQF 11** Apply critical analysis, evaluation, and synthesis to key models and theories of learning design. Develop original and creative solutions to the contextualised application of knowledge, skills, and understanding in learning design.
Communication, ICT and Numeracy Skills	**SCQF 11** Communicate effectively online with a range of audiences with different levels of technical knowledge. Communicate effectively with peers. Evaluate, adapt, and use a wide range of digital tools to support and enhance work at this level.
Autonomy, Accountability and Working with Others	**SCQF 11** Exercise substantial autonomy and initiative in a learning design project. Take responsibility for own work in designing learning.

Learning and Teaching	
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours. The learning on this module is online and practice-based. It aims to balance flexibility with the benefits of peer learning. Online discussion spaces and opportunities to collaborate are built into the module. While activities are mostly asynchronous, they are paced throughout the module to support your progress and maximise the opportunities for you to connect with your peers. Online synchronous sessions will be offered to support learning on the module. The materials and activities in the online learning space are intended to help you develop your practice in learning and teaching. You will also be asked to connect your practice to the theories, ideas and principles from the module.	
Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	**Student Learning Hours** (Note: Learning hours include both contact hours and hours spent on other learning activities)
Asynchronous Class Activity	25
Tutorial / Synchronous Support Activity	3
Practice-based Learning	17
Independent Study	55
TOTAL	100

Attendance and Engagement Requirements
In line with the Student Attendance and Engagement Procedure, Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time. **For the purposes of this module, academic engagement equates to the following:** satisfactory engagement with active learning hours, assessment, and the mentoring process.

Equality and Diversity
The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code.
(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
