| <p>The module introduces a number of topic areas related to the overall theme of accounting’s place and role within society. Accounting numbers and reports are viewed not only as technical products but as social products. They are influenced at the macro level by accounting standards, contracts, company law, and political and social processes. They reflect reality but at the same time they create their own new reality as they determine wealth distribution between contracting parties and other stakeholders such as government.</p> <p>Topics that might be included are as follows: (a) theories of business ethics, drawing on in particular French philosopher Michel Foucault’s concepts of how power/knowledge works within institutions to control, standardize, and normalize and his idea of ethics as “care for the self” within the context of the formation of oneself as a subject of morality; (b) commodification and alienation processes under capitalism; (c) cosmopolitanism and feminism, where these interrelated ideas clearly build upon earlier theories of normative ethics; (d) legitimacy and stakeholder theory; (e) agency theory and positive accounting theory; (f) corporate governance; and (g) executive pay.</p> <p>Dscussion in class will be encouraged and assessment will be in the form of a group presentation (20%) and an individual essay (80%). It is also hoped that students can add one or more theories taught in the module into their Honours dissertation.</p> |                                  |                                        |    |

<sup>1</sup> Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

<sup>2</sup> The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

<sup>3</sup> Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

<sup>4</sup> Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

### Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

#### Learning Activities

During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:

#### Student Learning Hours

(Note: Learning hours include both contact hours and hours spent on other learning activities)

Lecture / Core Content Delivery

24

Tutorial / Synchronous Support Activity

12

Independent Study

164

200

### Indicative Resources

**The following materials form essential underpinning for the module content and ultimately for the learning outcomes:**

There are no prescribed reading texts. For each issue to be considered within the module, students will be guided to 5 or 6 relevant articles, book chapters or books in the academic literature. It will be stressed that the referred sources should be viewed only as a starting point and that there will be an expectation that you will conduct further research into the academic literature for each element of the module.

**(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk\*) to wait until the start of session for confirmation of the most up-to-date material)**

### Attendance and Engagement Requirements

**In line with the [Student Attendance and Engagement Procedure](#), Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.**

**For the purposes of this module, academic engagement equates to the following:**

In line with the Academic Engagement and Attendance Procedure, Students are defined as academically engaged if they are regularly engaged with timetabled teaching sessions, course-related learning resources including those in the Library and on Moodle, and complete assessments and submit these on time.

### Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: [UWS Equality, Diversity and Human Rights Code](#).

Some topics in the module specifically link in to and explore issues of diversity, especially the topic of cosmopolitanism and feminism and teaching on global supply chains and cross-cultural management. Students are encouraged to write about non-European contexts.

To complete this module successfully, access to appropriate ICT facilities will be required to enable the student to engage with Aula for lecture notes, tutorial questions, additional study materials. In addition, the student would normally be required to undertake a two hour, closed book, hand-written exam. Where identified, appropriate arrangements will be made for additional assessment time and facilities.

**(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)**

### Supplemental Information
