### **Summary of Module**

The module provides an interdisciplinary and thematic approach to the understanding and analysis of contemporary management in the context of pressures of Globalisation and DeGlobalisation, of pressures of convergence, divergence, and crossvergence. As such, the module situates the complexities of contemporary business management within the dual ebb and flow of a world economy that is simultaneously increasingly interconnected and internationalising; and restrictive, decoupling, and re-nationalising. The module thus addresses a conceptual shift from VUCA (volatile, uncertain, complex, and ambiguous) environments in 1989 to TUNA (turbulence, unpredictable uncertainty, novelty, and ambiguity) environments in the present to build paths in which management would traverse an ever complex and contradictory world.

To do so the module examines empirical and theoretical developments in contemporary context and relates these developments to a thematic approach to prevailing debates that impact on management: (De)Globalisation, Cultures and Institutionalism; New Organisational Froms, Practices and New Social Innovations; New Employee and Consumer Experiences and Expectations.

The module is reflexively underpinned by the 4C's pedagogy in terms of critical thinking, creativity, collaboration, and communication.
