### **Summary of Module**

This module is designed to provide students with practical experience in planning and executing digital marketing strategies by building on the theoretical concepts covered in the module "Theoretical Perspectives in Digital Marketing." The focus of the module is on strategic decision-making and the development of effective digital marketing strategies. Students will learn to research, debate, develop, plan, and evaluate digital marketing strategies and compare the tactical use of different digital marketing channels in achieving strategic communication objectives. The module will be delivered in a lecture/workshop format, allowing students to engage in hands-on activities that will enhance their understanding of online market analysis, objective setting, and the development of integrated digital marketing strategies. They will also learn about budgeting, selecting the digital media mix, implementing digital marketing tactics, and evaluating and improving digital channel performance. Additionally, students will develop a critical understanding of content marketing, including message development and creative strategies. Overall, this module aims to equip students with the skills and knowledge needed to create and implement successful digital marketing campaigns.

Assessment (also refer to Assessment Outcomes Grids below)	
--	--

# Assessment 1 Two in class tests. After Week 4 and Week 8, there will be a 30- minute multiple choice test that will be held in class. This test can only be taken by students who are present in that class. The test may include topics covered by previous lectures, tutorials and assigned reading materials. Each test will include 15 questions. Both tests will be held during tutorial hours. The time of the test (in the beginning, middle, end of tutorial) will not be announced in advance, so it is highly recommended that you attend the tutorial in time to avoid missing the test. If the student arrives late to the test, they will not get a time extension. Assessment 2

The activity is to Critically evaluate a recent online promotional campaign (2021 onwards) by an organisation of your choice and then develop a new digital marketing strategy using the SOSTAC or RACE model showing supporting visual mock-ups, video content and how you would monitor and evaluate the success of the campaign using analytics and digital tools." Your plan must have specific objectives with clear implementation and control strategy. You must use an existing campaign in this assessment instead of reviewing the company overall. Your campaign can focus on a specific product/service campaign for the company of your choice. The word count for this assessment is 3,000 words.
