#### **Summary of Module**

The focus of this module is on International Business Management. The module will first examine the current patterns and trends, which are of key concern to business managers involved in Multi-National Enterprises (MNEs). Analysis of various approaches to motivation and leadership will be undertaken. Under the theme of globalisation, the significance of both national and organisational culture will be analysed in terms of their importance for international business dealings, through the work of cultural theorists such as Hofstede and Trompenaars. This will include the increasing influence of Eastern philosophical traditions as they impact, for example on the Chinese concept of relationship building (Guanxi) in the context of business dealings.

The module will then investigate via systematic approach to understanding organisations, and as the organisational environment is increasingly global, the focus will be on firms that operate internationally. Given the increasing use of international suppliers, manufacturers, service providers and distributors the module will consider the issues raised in the global nature of value chains. This will lead to a need for, and methods of, integration among the various organisational functions such as Marketing, Operations and HRM. The module will consider the internationalisation process, as well as international business theory and practice. Specific emphasis will be place on the social environments, ethical environments, as well as the environment, in addition to the many other strategic issues with which MNEs must contend.
