### **Summary of Module**

People are valuable assets of any successful organisation. This module aims to provide a broad overview of the foundations of people management known as the human resource management (HRM). HRM has developed as an area of applied academic knowledge to better understand work and work behaviours, and to effectively manage workforce (or HR human resources) in line with organizational strategies. HRM knowledge helps to inform people management practice by designing effective processes and policies at work and making responsible employment-related decisions spanning across organizational areas such as:

- ✓ workforce planning, recruitment and selection of employees
- ✓ motivation, engagement and development of employees
- ✓ retention of individuals and high-performance teams
- ✓ management of performance and employee relations.

All those areas of functional HRM help organisations to fulfill their strategic vision and performance targets. Focusing on the human aspects is inevitable in shaping optimal work environments, relationships and behaviors across all different profiles of organisations (for example, private/public, voluntary/charitable, large/small, local/international). In examining HRM students will gain understanding and develop knowledge about interconnected activities performed by HR practitioners. Finally, aspects related to the impact of the external environment, the changes in the world of work, workforce diversity and the role of HRM in organisational change will also feature in this module. In addition, students will gain vital academic skills, particularly focused on the conduct of basic academic desk-research, including selection, analysis and critique of academic literature.
