Summary of Module

This module provides learners with a critical reflexive understanding of the concepts of leadership and change by developing a multi-disciplinary approach to the development of knowledge about management and organisation and as explores leadership and change in the context of the dynamics of a rapidly changing world economy and society.

The module is based on the 4Cs pedagogy of critical thinking, creativity, collaboration, and communication and is predicated on the basis that the performance of organisations depends on employees at all levels being able to understand leadership and change. As such, the module examines a range of theoretical and practical approaches to the management of change, with particular emphasis on culture and power. The module offers means by which learners would subject models of leadership and change to sustained critical scrutiny.

This module focuses on key theories and techniques that relate to the leadership of change. Learners will develop skills of critically discerning and synthesising relevant information resulting from strategic analysis, making sound judgements in the absence of complete data and constructively challenging existing ideas and practices. Knowledge and skills relating to problem solving, team performance, and communication will also be addressed.

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

The module will be taught by a combination of lectures and tutorials as workshops. In the lectures and tutorials, a variety of participative teaching methods will be used. The approach to learning and teaching places emphasis on participation and support. Students will be encouraged to take a pro-active approach throughout with tutorials particularly aimed at encouraging debate and discussion between students. Focused group discussions, syndicated breakout discussions and individual support during tutorials will be strategies aimed at ensuring a quality student experience on the module.
