Summary of Module

The growth of global tourism and events is heavily reliant on effective policy and strategic planning. Informed tourism and event policy is shaped by creative, strategic, and resourceful individuals and agencies, including governments, the private sector, international organisations, academic institutions, and non-profit agencies. These stakeholders play a critical role in developing sustainable policies that extend beyond economic benefits to embrace environmental, cultural, and political dimensions.

Tourism and events are powerful tools for political and economic change, influencing governance, diplomacy, and international relations. From calls for tourist boycotts of politically controversial destinations to the use of events as platforms for political dialogue, the sector's impact is far-reaching.

This module aims to develop strong research, analytical, and technical skills alongside an appreciation of theoretical frameworks, concepts, methods, and approaches essential for successful tourism and event policy and planning. Key learning outcomes include:

- Developing a critical understanding of the relationship between tourism, events, and government policy.
- Gaining insight into the impact of national and international organisations on tourism and event planning and policy.
- Examining contemporary policy issues in tourism and events, particularly in relation to political influence and global governance.

By engaging with these themes, students will acquire a comprehensive understanding of the complexities of policy-making in tourism and events, preparing them to navigate the evolving landscape of this dynamic industry.
