Summary of Module

This module aims to provide students with the required people management knowledge, understanding and skills to successfully perform in a HR generalist role. This is achieved through a focus on five key areas:

- The Role and Contribution of HRM
- Recruitment and Selection
- Human Resource Development
- Employment Relations
- Motivation, Performance and Reward

The module seeks to familiarise students with major contemporary research evidence on employment and effective approaches to human resource management. Research focusing on the links between people management practices and positive organisational outcomes is covered, as is research that highlights major contemporary changes and developments in practice.

This module introduces students to contemporary debates around leadership, flexibility and change management, with the intention of developing effective leadership skills, as the HR generalist may also be in a leadership position.

This module utilises activities which focus on examples from industry, non-governmental departments, and the professional body, in order to develop authenticity in learning, bridge the gap between theory and practice, and create exposure to the profession. This is also reflected in module assessments.

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

The learning and teaching activities of this module have been developed in line with the UWS Curriculum Framework, including a range of learning and assessment techniques. The formative and summative learning, and teaching activities and assessment instruments are adopted with the aim of providing learners with the opportunity to manage partnerships with fellow students in informal group activities and to develop autonomous engagement in the coursework.

The instruments of assessment are combined to provide learners with externally facing workplace relevant knowledge that is enhanced by a commitment to scholarly practice that enriches competence and resilience. Students will gain core knowledge in interactive activities and apply that knowledge in student led tutorials.
