## Module Descriptor

Session: 2024/25

<b>Title of Module: Stakeholder Management and Governance</b>			
<b>Code: ENGG11057</b>	<b>SCQF Level: 11 (Scottish Credit and Qualifications Framework)</b>	<b>Credit Points: 20</b>	<b>ECTS: 10 (European Credit Transfer Scheme)</b>
<b>School:</b>	School of Computing, Engineering and Physical Sciences		
<b>Module Co-ordinator:</b>	Dr Nor Azuana Mat Said		
<b>Summary of Module</b>			
<p>In a dynamic, volatile and post-pandemic environment, stakeholder management has become more crucial than before. For organisation to survive and compete in achieving sustainability, sustainability professionals must be able to analyse their stakeholders' expectations and tailor their engagement approaches to meet the demands of different audiences. Stakeholders are people or groups affected by or influencing an organisation. They play a critical role, whether that is related to employee stakeholders and their motivation, or a customer base and what might impact their decisions.</p> <p>To find success, an organisation must interact, to varying degrees, with a range of stakeholders. This enables an organisation to manage messaging and expectation, and to gain insight into how stakeholders perceive them. A key step in doing this is to map your stakeholders. In doing so, organisations can be much more strategic in their approach – particularly when it comes to corporate governance.</p> <p>Within this module, an overview of stakeholder management, engagement and influence, forming, building and leading teams, and the generic skills and responsibilities of being sustainability professionals are addressed with the objective of making it clear that all project-based work relies fundamentally on the ability of people to work together. Managing and leading change, and critical perspectives of ethical and social responsibility, towards sustainable development will be appreciated. This includes acknowledging governance structures, establishing governance and oversight.</p>
