| Face-To-<br>Face | Blended      | Fully Online | HybridC | HybridO | Work-based<br>Learning |
|                  | $\checkmark$ |              |         |         |                        |
| Face-To-Face     |              |              |         |         |                        |

Term used to describe the traditional classroom environment where the students and the lecturer meet synchronously in the same room for the whole provision.

Blended

A mode of delivery of a module or a programme that involves online and face-to-face delivery of learning, teaching and assessment activities, student support and feedback. A programme may be considered "blended" if it includes a combination of face-to-face, online and blended modules. If an online programme has any compulsory face-to-face and campus elements it must be described as blended with clearly articulated delivery information to manage student expectations

**Fully Online** 

Instruction that is solely delivered by web-based or internet-based technologies. This term is used to describe the previously used terms distance learning and e learning.

HybridC

Online with mandatory face-to-face learning on Campus

HybridO Online with optional face-to-face learning on Campus

Work-based Learning Learning activities where the main location for the learning experience is in the workplace.

### Learning Outcomes: (maximum of 5 statements)

On successful completion of this module the student will be able to:

L1. Demonstrate a critical understanding of the specialised theories, concepts and principles of the data structures associated with the `ext' filesystems and the forensic artefacts specific to Linux.

L2. Apply knowledge, skills and understanding in using the principal skills, techniques, practices required to construct and execute an appropriate forensic analysis of a Linux based device whilst preserving evidential integrity.

L3. Analyse and critically evaluate Linux forensics artefacts at various levels of abstraction, including those related to partitioning, file systems and the OS.

#### Learning and Teaching

An emphasis is placed on active learning, taking place through a collection of complementary mechanisms. Topics will be introduced in lectures and discussed through problem based learning activities and associated practical sessions. Theoretical material will be re-enforced and consolidated through the critical analysis and discussion of case studies in tutorials designed to explain and elaborate both on theoretical and laboratory content and provide examples of current practice, approaches and challenges as portrayed by practitioners across various industry sectors. Students are guided through real-world scenarios featuring structured inquiry based learning. Additionally directed learning will reinforce essential theory and place understanding into context. In addition, students will adopt an independent learning style, acquiring and applying knowledge through their own enquiry and professional practise. Students will be encouraged to engage in active peer-assisted learning enabling students to reflectively discuss their experiences in practise.

| <b>Learning Activities</b><br>During completion of this module, the learning activities undertaken<br>to achieve the module learning outcomes are stated below: | Student Learning Hours<br>(Normally totalling 200 hours):<br>(Note: Learning hours include both contact<br>hours and hours spent on other learning<br>activities) |
|---|---|
| Lecture/Core Content Delivery   | 10  |
| Tutorial/Synchronous Support Activity   | 5   |
| Laboratory/Practical Demonstration/Workshop   | 20  |
| Independent Study   | 65  |
|   | 100 Hours Total   |

### \*\*Indicative Resources: (eg. Core text, journals, internet access)

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Polstra, P. (2015) Linux Forensics. CreateSpace Independent Publishing Platform.

(\*\*N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk\*) to wait until the start of session for confirmation of the most up-to-date material)

### **Engagement Requirements**

In line with the Academic Engagement Procedure, Students are defined as academically engaged if they are regularly engaged with timetabled teaching sessions, course-related learning resources including those in the Library and on the relevant learning platform, and complete assessments and submit these on time. Please refer to the Academic Engagement Procedure at the following link: <u>Academic engagement procedure</u>

### Assessment: (also refer to Assessment Outcomes Grids below)

Coursework (100%)

(N.B. (i) Assessment Outcomes Grids for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed.

(ii) An **indicative schedule** listing approximate times within the academic calendar when assessment is likely to feature will be provided within the Student Handbook.)

## Footnotes

A. Referred to within Assessment Section above

B. Identified in the Learning Outcome Section above

Note(s):

- 1. More than one assessment method can be used to assess individual learning outcomes.
- Schools are responsible for determining student contact hours. Please refer to University Policy on contact hours (extract contained within section 10 of the Module Descriptor guidance note). This will normally be variable across Schools, dependent on Programmes &/or Professional requirements.

### Equality and Diversity

This module is suitable for any student. The assessment regime will be applied flexibly so that a student who can attain the practical outcomes of the module will not be disadvantaged. When a student discloses a disability, or if a tutor is concerned about a student, the tutor in consultation with the School Enabling Support co-ordinator will agree the appropriate adjustments to be made.

UWS Equality and Diversity Policy

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
