Summary of Module

Through structured engagement with relevant textual and audiovisual resources, this module provides participants with opportunities to reflect on own practice in the area of leadership in education, and to plan the next steps in their professional development. A range of tasks and activities undertaken in the course of group and independent work serve to:

- · Facilitate participants in reflecting on what they bring to the module in terms of prior experience of working with teams;
- · Promote critical understanding of the qualities and skills that might underpin team leadership.
- · Support participants in identifying areas of strength and opportunities for development in relation to the qualities and skills that might underpin team leadership.

Through discussions, debates and personal responses the main issues and tensions associated with effective team leadership are explored both from a historical perspective but also within the contemporary context. Current trends and their application in the education context are examined, and implications are considered. The module assessment will relate to the participant's practice and specific work environment.

The module focuses on the quality and skills needed for team leadership in the educational context, with a focus on the leadership and management of change within the participant's professional context. Participants will undertake a reflective essay (or video plus essay submission) focusing on the main features of a change process in their own professional context and how a critical understanding of leadership of teams can impact on this process.

The UWS Graduate Attributes that are commonly developed through the completion of this module are:

- · Development of leadership knowledge and skills;
- · Critical and analytical thinking;
- · Resilience, autonomy and motivation;
- · Effective communication and collaboration;
- · Development of professional knowledge and skills
