Module Co-ordinator:	J Hopkin						

### **Summary of Module**

Building on the Domains of Practice module, students will develop understanding the world as an ever changing and increasingly complex phenomenon that offers tremendous opportunities for those working in youth and community work. Community Development practices are underpinned by understandings of what it means to be a citizen and our obligations to each other as social beings, in working together to achieve a good life.

This module is designed to reinforce critical and deep understanding of community development through evaluation of current community development approaches. It aims to develop theoretically informed, systemic and historical awareness of community development practice. Students will have an opportunity to investigate the principles and practices of Community Development, whereby community-based education is founded in informal education and rooted in social practices.

Students will examine ideas on the inter-linkages between economy, culture and society in order to question contemporary critically reflect on core principles required to underpin engagement with community politics and relationship building. They will consider the thinking behind citizenship, participation and democracy and how it impacts generally and specifically in community development. It is expected that students will be able to help play a central co-ordinating role in their establishment through knowledge gained, particularly in developing an international perspective and a more sophisticated approach to research. Students will examine practice through a mixture of faculty expertise and outside speakers. In particular, this will include:

- Democracy and world events
- Sustainability
- Global issues and global citizenship
- Innovative approaches in community development.

#### Assessment: (also refer to Assessment Outcomes Grids below)

The assessment for this module will be compatible with published principles and is intended to be both sustainable (fit for contemporary purpose and future development) and constructively aligned (integral to methods for teaching and learning). Quality assurance for assessment is obtained through joint planning and scrutiny in a systematic process each trimester (Quality Assurance and Review Group-QARG). The assignment will therefore be equivalent to a 3000 word paper drawing from a range of assessment instruments that may include academic paper; report; facilitated workshop; illustrated talk; video production; lecture; or poster.
