

University of the West of Scotland

Module Descriptor

Session: 2024/25

Title of Module: PGDE (S) Subject Studies (Dual)			
Code: EDUC 10029	SCQF Level: 10 (Scottish Credit and Qualifications Framework)	Credit Points: 40	ECTS: 20 (European Credit Transfer Scheme)
School:	School of Education & Social Sciences		
Module Co-ordinator:	E Wotherspoon		
Summary of Module			
<p>This module will enable students to develop knowledge and understanding and skills and abilities in relation to the curriculum, pedagogy and assessment of two subject area within the secondary curriculum. It will enable the contextualising within specific curricular areas of some of the broader principles explored in the PGDE (S) School Experience module.</p> <p>Curriculum: Students will explore the principles of curriculum design, contexts for learning, and the processes of change and development in the curriculum.</p> <p>Pedagogy: Students will understand the methods and underlying theories for effective teaching and learning and learn how to plan appropriately in order to meet the needs of all learners, across different contexts and experiences.</p> <p>Assessment: Students will develop knowledge and understanding of the principles of assessment and how to use a range of approaches for formative and summative assessment purposes, appropriate to the needs of all learners and the requirements of the curriculum and awarding and accrediting bodies, record assessments appropriately, use assessment information to review progress, inform and enhance teaching and learning, identify strengths and development needs which lead to further learning opportunities, and produce clear, informed and sensitive reports.</p> <p>Professional qualities and capabilities</p> <p>The module will enable students to engage in professional dialogue with peers and university staff and to work collaboratively. Students will be expected to model appropriate levels of literacy and numeracy in learning activities; to reflect on the impact of their personal communication on others and to demonstrate appropriate levels of health and wellbeing relevant to the teaching profession.</p>			
Module Delivery Method			

Face-To-Face	Blended	Fully Online	HybridC	Hybrid 0	Work-Based Learning

Campus(es) for Module Delivery						
The module will normally be offered on the following campuses / or by Distance/Online Learning: (Provided viable student numbers permit) (tick as appropriate)						
Paisley:	Ayr:	Dumfries:	Lanarkshire:	London:	Distance/Online Learning:	Other:
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Add name

Term(s) for Module Delivery					
(Provided viable student numbers permit).					
Term 1		Term 2		Term 3	
	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>		<input type="checkbox"/>

Learning Outcomes: (maximum of 5 statements) These should take cognisance of the SCQF level descriptors and be at the appropriate level for the module. At the end of this module the student will be able to:	
L1	Demonstrate knowledge that covers and integrates most of the principal areas, features, boundaries, terminology and conventions of the curriculum, pedagogy and assessment of two subject areas within the secondary curriculum and a critical understanding of the principal theories, concepts and principles.
L2	Use a wide range of the principal skills, techniques, practices and materials associated with two subject areas of secondary education, some of which are specialised, advanced or at the forefront of classroom practice, in a variety of settings, environments and circumstances.
L3	Adopt an enquiring approach to professional practice, demonstrating some originality and creativity in planning teaching, learning and assessment.
L4	Construct and sustain reasoned and coherent arguments about the curriculum, pedagogy and assessment of two subject areas of secondary education.
L5	Exercise autonomy and initiative in planning and reporting on a defined project of action research related to teaching and learning in a subject area of secondary education.
Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:

<p>Knowledge and Understanding (K and U)</p>	<p>SCQF Level 10</p> <p>Demonstrating knowledge that covers and integrates most of the principal areas, features, boundaries, terminology and conventions of the curriculum, pedagogy and assessment of two subject areas within the secondary curriculum.</p> <p>Understanding critically the principles and evolving theories of curriculum design, contexts for learning and cross-curricular links.</p> <p>Understanding in detail a subject area within the secondary curriculum, current educational issues and effective approaches to teaching and learning.</p> <p>Understanding the ways in which teaching and learning are developed, including a range of established techniques of professional enquiry.</p> <p>Demonstrating knowledge of how to access and apply relevant findings from educational research.</p>
<p>Practice: Applied Knowledge and Understanding</p>	<p>SCQF Level 10</p> <p>Designing effective, appropriate and stimulating programmes of work, in two subject areas within the secondary curriculum, which are suitable for children at different stages of secondary education.</p> <p>Using skills, practices and materials which are specialised, advanced or at the forefront of classroom practice.</p> <p>Planning and reporting on a defined project of action research related to teaching and learning in a chosen subject area of secondary education.</p>
<p>Generic Cognitive skills</p>	<p>SCQF Level 10</p> <p>Undertaking critical analysis, evaluation and synthesis of ideas, concepts, information and issues in educational contexts.</p> <p>Justifying a personal stance on educational issues by referring to appropriate evidence from a range of sources.</p> <p>Reflecting on and acting to improve the effectiveness of their own practice.</p> <p>Adopting an enquiring approach to professional practice, demonstrating some originality and creativity in finding solutions to professional issues.</p> <p>Maintaining a record of personal professional learning and development.</p>
<p>Communication, ICT and Numeracy Skills</p>	<p>SCQF Level 10</p> <p>Communicating effectively, using a variety of media including digital technologies, with peers and university staff.</p> <p>Communicating and reporting effectively, both orally and in writing.</p> <p>Engaging in professional dialogue with peers, university staff and school colleagues.</p>

	Constructing and sustaining reasoned and coherent arguments about educational matters and professional practices.	
Autonomy, Accountability and Working with others	<p>SCQF Level 10</p> <p>Exercising autonomy and initiative in professional activities.</p> <p>Working with others and, at times, taking a leading role in bringing about change, development and new thinking relating to curriculum, pedagogy or assessment of a subject area within the secondary curriculum.</p>	
Pre-requisites:	Before undertaking this module the student should have undertaken the following:	
	Module Code:	Module Title:
	Other:	
Co-requisites	Module Code:	Module Title:

Learning and Teaching

In all modules on the PGDE (Secondary) programme, we take an authentic, best-practice and forward-looking approach to learning activities and assessment. There is a strong emphasis on situated learning and real professional scenarios. We are committed to interactive learning and the small number of learning activities that are purely transmission of information are normally pre-recorded. In workshops, which utilise classrooms, and other facilities as appropriate, the outdoors and the Aula VLE, main methodologies include collaborative working, problem-based learning, real-world tasks, research-based learning, enquiry-based learning, micro teaching, student presentations, concept visualisation (e.g. drawing and collage), walking, experiments, play/games. These will vary depending on the secondary subject studied and will include other subject-specific methodologies as appropriate. All learning activities are aligned to relevant aspects of the professional standards. Individual, group or tutor-led reflection is required throughout. Learning activities develop 21st century skills such as communication, collaboration, digital skills, creativity and critical thinking. Learning activities, assessment and feedback, where appropriate, provide students with choice, such as choice of focus in the assessment for this module.

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	Student Learning Hours (Normally totalling 200 hours): (Note: Learning hours include both contact hours and hours spent on other learning activities)
Tutorial/Synchronous Support Activity	144
Laboratory/Practical Demonstration/Workshop	48

Work Based Learning/Placement	70
Asynchronous Class Activity	48
Independent Study	90
	400 Hours Total

****Indicative Resources: (eg. Core text, journals, internet access)**

The following materials form essential underpinning for the module content and ultimately for the learning outcomes. Those indicated with an asterisk (*) are considered core texts for each subject.

All Subjects:

- *Curriculum for Excellence documentation, including the Building the Curriculum series, and support materials at www.educationscotland.gov.uk
- *National Qualifications documentation and support materials at www.sqa.gov.uk

(**N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the [Student Attendance and Engagement Procedure](#): Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

Students are required to attend all scheduled classes and participate with all delivered elements of the module as part of their engagement with their programme of study. Consideration will be given to students who have protection under the appropriate equality law. Please refer to UWS Regulations, Chapter 1, 1.64 – 1.67, available at the following link: <http://www.uws.ac.uk/current-students/rights-and-regulations/regulatory-framework/>

Dual subject students are required to attend subject studies sessions for both subjects that they are studying.

In accordance with module and programme handbooks, any student whose attendance has fallen below the 75% minimum requirement for a module could be withdrawn from and given a re-attend decision for that module. To assure placement partners that students are appropriately prepared to undertake periods of school experience, unsatisfactory attendance across academic modules may prevent progress to placement, or result in withdrawal from the programme, as a student would be deemed not to have met the professional requirements of the programme as accredited by the GTCS.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: [UWS Equality, Diversity and Human Rights Code](#).

Aligned with the overall commitment to equality and diversity stated in the Programme Specifications, the module supports equality of opportunity for students from all backgrounds and with different learning needs. Using Moodle, learning materials will be presented electronically in formats that allow flexible access and manipulation of content. The module complies with University regulations and guidance on inclusive learning and teaching practice. Specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and

regulations. The University's Equality, Diversity and Human Rights Policy can be accessed at the following link: <http://www.uws.ac.uk/equality/>

Our partners are fully committed to the principles and practice of inclusiveness and our modules are designed to be accessible to all. Where this module is delivered overseas, local equivalent support for students and appropriate legislation applies.

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)

Supplemental Information

Divisional Programme Board	Education
Assessment Results (Pass/Fail)	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Moderator	R. Fotheringham
External Examiner	J. Munro
Accreditation Details	General Teaching Council for Scotland
Changes/Version Number	1.08 Reviewed for 24/25 Session

Assessment: (also refer to Assessment Outcomes Grids below)

Summative assessment will be based on a written assignment of 6,000 words comprised of three parts: critical discussion of assessment theory in relation to national summative assessment in a subject area of the secondary curriculum; a report of an action research project evaluating the impact of particular teaching and learning or assessment strategies; and reflection on development of professional knowledge and understanding and skills and abilities as a result of completing the action research project.

Students will be required to submit a written assignment proposal in preparation for undertaking research on placement.

Throughout the module, students will complete additional formative assessment tasks which will focus on preparing students for school experience and will relate to planning and selecting appropriate teaching and learning methods and assessment strategies.

Student handbooks, and other detailed material made available to students, will clarify the relationship between formative assessment and the specific learning outcomes for the module. This will ensure that students can relate feedback from formative assessment to their individual progress on the learning outcomes for the module. On summative assessments, students will receive detailed information indicating the ways in which summative assessments will assess individual learning

outcomes for the module. As appropriate, students will also receive detailed information on how feedback will be provided for assessments.

(N.B. (i) **Assessment Outcomes Grids** for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed.

(ii) An **indicative schedule** listing approximate times within the academic calendar when assessment is likely to feature will be provided within the Student Module Handbook.)
