Module Descriptor

Session: 202425

Title of Module: Migration, State & Society			
Code: SOCY10022	SCQF Level: 10 (Scottish Credit and Qualifications Framework)	Credit Points: 20	ECTS: 10 (European Credit Transfer Scheme)
School:	School of Education & Social Sciences		
Module Co-ordinator:	E Pietka Nykaza		
Summary of Module			
<p>The issue of migration is a publicly volatile topic in most countries, expressed in media metaphors of 'floods' and 'spongers', and institutionalised in policies to build 'fortresses' and force assimilation. What is distinctly lacking in these public discourses and policies is a conceptual, historical and comparative understanding of migration processes. This module encourages students to investigate a range of migration themes in the contemporary world through a combination of conceptual analysis, thematic focuses, and empirical case-studies.</p> <p>The module begins with an examination of migration patterns and key concepts in migration theory. The second part of the module explores key themes related to migration including: human rights, immigration policy and citizenship, forced migration, securitisation, development and integration. Finally, this module focuses on the national case-studies of high-income countries, and inter-relationships between specific countries or regions of the world with respect to migration.</p> <p>The objectives of the course are: to examine the main theories and concepts in the fields of migration studies; to foster a critical understanding of migration processes topics in contemporary societies; and to highlight the need for a better informed public discourse and policies to address these increasingly significant policy issues in the modern world.</p>
