

Module Descriptor

Title	Disease: Detection, Monitoring and Therapy		
Session	2024/25	Status	
Code	BIOL11011	SCQF Level	11
Credit Points	20	ECTS (European Credit Transfer Scheme)	10
School	Health and Life Sciences		
Module Co-ordinator	John McLean		

Summary of Module

This module will provide students with an in depth understanding of the role of biomedical science in the detection, monitoring, and therapies of diseases.

Students will study the pathologies of selected systems and examine how clinical chemistry, blood sciences, bacteriology and cellular pathology integrate to aid in the diagnosis, monitoring, and treatment of disease. There will also be a critical analysis of the techniques used in biomedical science.

Using case studies and an oral presentation students will investigate the role of biomedical science in an area(s) of interest to them. Directed study and academic support will be given. The assessments will facilitate a better understanding of the application of available and developing technologies in detection, monitoring and therapy of diseases and conditions of relevance to healthcare.

The fully online/distance learning version of the module is available only to students currently employed by an appropriate UK-based healthcare provider (e.g. IBMS-approved training site).

Completion of the module allows the student to meet the following graduate attributes: critical thinker, digitally literate, analytical.

Module Delivery Method	On-Campus ¹	Hybrid ²	Online ³	Work -Based Learning ⁴
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Campuses for Module Delivery	<input type="checkbox"/> Ayr		<input checked="" type="checkbox"/> Lanarkshire		<input checked="" type="checkbox"/> Online / Distance Learning	
	<input type="checkbox"/> Dumfries		<input type="checkbox"/> London		<input type="checkbox"/> Other (specify)	
Terms for Module Delivery	Term 1	<input type="checkbox"/>	Term 2	<input checked="" type="checkbox"/>	Term 3	<input type="checkbox"/>
	Long-thin Delivery over more than one Term	Term 1 – Term 2	<input type="checkbox"/>	Term 2 – Term 3	<input type="checkbox"/>	Term 3 – Term 1

Learning Outcomes	
L1	Discuss critically the role of biomedical science in detection, monitoring and treatment of disease, including technologies available.
L2	Demonstrate a critical understanding of the integration of clinical chemistry, blood sciences, bacteriology and cellular pathology investigations in biomedical science.
L3	Demonstrate a critical understanding of the integration of clinical chemistry, blood sciences, bacteriology and cellular pathology investigations in biomedical science.
L4	Be able to integrate and critically analyse information from a range of sources through directed independent learning.
L5	

Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:
Knowledge and Understanding (K and U)	Please select SCQF Level A broad and integrated knowledge of the application of biomedical science, particularly clinical chemistry, in diagnosing, monitoring and treatment of disease.
Practice: Applied Knowledge and Understanding	Please select SCQF Level Demonstrate critical analysis of the processes in selected pathological conditions.
Generic Cognitive skills	Please select SCQF Level Apply critical analysis, evaluation and synthesis to issues which are at the forefront of selected pathological conditions.
Communication, ICT and Numeracy Skills	Please select SCQF Level Undertake critical evaluations of a wide range of numerical and graphical data through the use of case studies and directed learning.
Autonomy, Accountability and Working with Others	Please select SCQF Level Take responsibility for own work and for utilising a significant range of resources.

Prerequisites	Module Code	Module Title
	Other Equivalent module from a Biomedical Science or Bioscience degree or appropriate APEL.22	

Co-requisites	Module Code	Module Title
---------------	-------------	--------------

Learning and Teaching	
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.	
Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	Student Learning Hours (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	22
Tutorial / Synchronous Support Activity	14
Independent Study	164

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the [Student Attendance and Engagement Procedure](#), Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

Attendance at synchronous sessions (lectures, tutorials and practicals), completion of asynchronous activities, and submission of assessments to meet the learning outcomes of the module. Attendance at synchronous sessions is not required for students undertaking the distance learning version of the module.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: [UWS Equality, Diversity and Human Rights Code](#).

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
