

Module Descriptor

Title	Genetic Analysis in Biomedical Science		
Session	2024/25	Status	
Code	BIOL11012	SCQF Level	11
Credit Points	20	ECTS (European Credit Transfer Scheme)	10
School	Health and Life Sciences		
Module Co-ordinator	John McLean		
Summary of Module			
<p>This module is designed to provide an indepth coverage of the major advances in nucleic acid technology primarily in our understanding of genetics in diseases and conditions of relevance to biomedical science. The application of available and developing technologies in detection, monitoring, therapy, and prognosis will be discussed.</p> <p>Students will gain a critical understanding of the application of nucleic acid analysis in biomedical science. The module content will build upon the basic knowledge of nucleic acids and their biological functions to study the processes underlying gene expression and manipulation including topics such as splicing, sequencing, gene cloning and nucleic acid amplification. The module will also examine how identification and characterisation of genes involved in disease can aid their detection, diagnosis, and treatment. The module will be student centred and allow students to apply knowledge gained in an area of interests to them.</p> <p>The fully online/distance learning version of the module is available only to students currently employed by an appropriate UK-based healthcare provider (e.g. IBMS-approved training site).</p> <p>Completion of the module allows the student to meet the following gardaute attributes: critical thinker, digitally literate, analytical.</p>			

Module Delivery Method	On-Campus¹	Hybrid²	Online³	Work -Based Learning⁴
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Campuses for Module Delivery	<input type="checkbox"/> Ayr <input type="checkbox"/> Dumfries		<input checked="" type="checkbox"/> Lanarkshire <input type="checkbox"/> London <input type="checkbox"/> Paisley		<input checked="" type="checkbox"/> Online / Distance Learning <input type="checkbox"/> Other (specify)	
	Term 1	<input checked="" type="checkbox"/>	Term 2	<input type="checkbox"/>	Term 3	<input type="checkbox"/>
Long-thin Delivery over more than one Term	Term 1 – Term 2	<input type="checkbox"/>	Term 2 – Term 3	<input type="checkbox"/>	Term 3 – Term 1	<input type="checkbox"/>

Learning Outcomes	
L1	Discuss critically the techniques involved in gene detection and analysis specifically in biomedical science.
L2	Demonstrate an in depth understanding of the implications and relevance of genome projects.
L3	Be able to integrate and critically analyse information from a range of sources through directed independent learning.
L4	
L5	

Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:
Knowledge and Understanding (K and U)	SCQF 11 A broad and integrated knowledge of the application of biomedical science, particularly the utility of genetic analysis.
Practice: Applied Knowledge and Understanding	SCQF 11 Demonstrate critical analysis of the processes in selected pathological conditions.
Generic Cognitive skills	SCQF 11 Apply critical analysis, evaluation and synthesis to issues which are at the forefront of selected pathological conditions.
Communication, ICT and Numeracy Skills	SCQF 11 Undertake critical evaluations of a wide range of numerical and graphical data through the use of case studies and directed learning.
Autonomy, Accountability and Working with Others	SCQF 11 Take responsibility for own work and for utilising a significant range of resources.

Prerequisites	Module Code	Module Title
	Other Equivalent module from a Biomedical Science or Bioscience degree or appropriate APEL.	
Co-requisites	Module Code	Module Title

Learning and Teaching	
<p>In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.</p> <p>During completion of this module, the learning activities undertaken to achieve the module learning outcomes will include formal lectures, structured seminars and tutorials, and independent study. VLE-based support materials will be available to supplement the module.</p>	
Learning Activities	Student Learning Hours
During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	22
Laboratory / Practical Demonstration / Workshop	14
Independent Study	164

Indicative Resources
<p>The following materials form essential underpinning for the module content and ultimately for the learning outcomes:</p> <p>Due to the advanced nature of the module content the required and recommended reading will in part be drawn from current review articles and research papers in the human clinical genetics and cancer field e.g. PNAS, Science, Nature Genetics, Oncogene, etc</p> <p>Essential:</p> <p>New Clinical Genetics; Reid A, Donnai Dian; 2007; ISBN 9781904842316 Scion Publishing Ltd</p> <p>(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)</p>

Attendance and Engagement Requirements
<p>In line with the Student Attendance and Engagement Procedure, Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.</p> <p>For the purposes of this module, academic engagement equates to the following:</p> <p>Attendance at synchronous sessions (lectures, tutorials and practicals), completion of asynchronous activities, and submission of assessments to meet the learning outcomes of the module. Attendance at synchronous sessions is not required for students undertaking the distance learning version of the module.</p>

Equality and Diversity
The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code .
(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)

Supplemental Information

Divisional Programme Board	Biological Sciences Health
Overall Assessment Results	<input type="checkbox"/> Pass / Fail <input checked="" type="checkbox"/> Graded
Module Eligible for Compensation	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If this module is eligible for compensation, there may be cases where compensation is not permitted due to programme accreditation requirements. Please check the associated programme specification for details.
School Assessment Board	Biological Sciences and Health
Moderator	Robin Freeburn
External Examiner	
Accreditation Details	This module is part of the MSc Advanced Biomedical Science programme; accredited by Institute of Biomedical Science (IBMS).
Module Appears in CPD catalogue	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Changes / Version Number	2.10

Assessment (also refer to Assessment Outcomes Grids below)
Assessment 1
Review/ Article/ Critique/ Paper
Assessment 2
Case Study - Wiki
Assessment 3
(N.B. (i) Assessment Outcomes Grids for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed. (ii) An indicative schedule listing approximate times within the academic calendar when assessment is likely to feature will be provided within the Student Module Handbook.)

Component 1							
Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
Review/ Article/ Critique/ Paper	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	50	0

Component 2							
Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
Case Study - Wiki	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	50	0

Component 3
