Summary of Module

The module provides students with foundational knowledge in anatomy and physiology as it relates to human development across the lifespan. Students will be provided with a foundational knowledge of life sciences to enable them to practice safely and effectively.

Students will study the following:

- Body Systems: Cells & Structure, Respiratory, Cardiovasular, Nervous, Reproductive, Endocrine
- Poisoning, Infection & Overdose
- Embryogenesis, Child Development & Adolescence
- Learning disability & cognition
- Dementia
- Introduction to the pathophysiology of trauma
- Introduction to maternity and normal delivery
- Pharmacology, pharmacokinetics, pharmacodynamics.
- Microbiology, parasites, and infection

Method Learning	Module Delivery Method	On-Campus¹	Hybrid² ⊠	Online ³	Work -Based Learning⁴
-----------------	---------------------------	------------	--------------	---------------------	--------------------------

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Lear	ning Outcomes
L1	Demonstrate foundational knowledge of anatomy, physiology and human development.
L2	Recognise key physiological processes and demonstrate their relevance to safe practice.
L3	Apply the principles of microbiology and the prevention of infection to healthcare environments.
L4	Describe the principles of pharmacology.
L5	Demonstrate application of bioscience knowledge to person-centred health assessment

Employability Skills and Personal Development Planning (PDP) Skills					
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:				
Knowledge and	SCQF7				
Understanding (K and U)	The nature and purpose of scientific enquiry. Developing foundational knowledge of life sciences and its relevance to healthcare practice.				
	Human development and physiological changes across the lifespan.				
Practice: Applied	SCQF7				
Knowledge and Understanding	Apply knowledge of physiological processes to safe practices.				
Generic	SCQF7				
Cognitive skills	Developing investigative problem solving and decision making skills.				
Communication,	SCQF7				
ICT and Numeracy Skills	Engaging with a range of technologies to enhance independent learning. Developing a range of communication and interpersonal skills. Using a range of numerical skills in relation to physiological processes				
	Understanding of medical, nursing, and paramedic terminology linked to professional communication.				
Autonomy,	SCQF7				
Accountability and Working with	Developing self-confidence and self-efficacy.				
Others	Developing professional accountability and an appreciation of their role within the multi-disciplinary team

Co-requisites	Module Code	Module Title

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

Foundational knowledge will be delivered as a combination of lectures and tutorials supported by online material. Knowledge will be applied to Paramedic practice through practical skills sessions. The learning and teaching strategies applied to this module contribute towards the development of UWS graduate attributes:

- Universal: Inquiring, analytical, collaborative
- Work-ready: Knowledgeable, digitally literate, problem solver
- Successful: Creative, driven

Learning Activities During completion of this module, the learning activities undertaken	Student Learning Hours
to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	29
Tutorial / Synchronous Support Activity	20
Laboratory / Practical Demonstration / Workshop	21
Independent Study	118
Asynchronous Class Activity	12
Please select	
TOTAL	200

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Elling, B.; Elling, KM. (2006) Paramedic: Pathophysiology (MOS Paramedic). 1st Edition. Jones and Bartlett Publishers.

Blaber, A. & Harris, G. (2016) Assessment Skills for Paramedics 2nd Edition. Open University Press.

Tortora, G.J., Derrickson, B. (2017) Tortora's principles of anatomy & physiology. New Jersey: Wiley [Core text]

Class Professional Publishing (2021) JRCALC Plus App inc. SAS Guidelines v1 .2.17 [Mobile Application Software]

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

In line with the Student Attendance and Engagement Procedure, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time. For the purposes of this module, academic engagement equates to the following: Students are expected to attend 100% of module sessions and complete all assigned asynchronous content. Students who fail to achieve a minimum of 80% attendance will not be eligible for assessment.

Equality and Diversity
The University's Equality, Diversity and Human Rights Procedure can be accessed at the
following link: UWS Equality, Diversity and Human Rights Code.
(N.B. Every effort will be made by the University to accommodate any equality and
diversity issues brought to the attention of the School)
