

Module Descriptor

Title	Resilience in Healthcare				
Session	2025/26	Status	Published		
Code	NURS08059	SCQF Level	8		
Credit Points	30	ECTS (European Credit Transfer Scheme)	15		
School	Health and Life Sciences				
Module Co-ordinator	Bill Deans				

Summary of Module

The purpose of this module is to enhance the students' knowledge, skills and capabilities in promoting resilience and utilising protective factors to support safe, values based, person centred care across the lifespan. Professional, legal and ethical principles and frameworks in the protection of vulnerable people is threaded throughout. The student will explore resilience from an individual, community and health and social care perspective.

The module consists of a 6-week theoretical component and a 7-week practice learning experience. Some of the principles underpinning the module include safety, loss, empowerment, self-management, risk, relationships, emotional and cultural competence. These principles will form the basis for the students to advance their capabilities in supporting safe, values based, person centred care through strengths and asset-based approaches and interventions.

The principles underpinning the module will form the basis for the students to advance their capabilities in supporting safe, values-based care through strengths and asset-based approaches and interventions. Programme threads of Law and Safeguarding, Digital Health Technology, Trauma, PEOLC and Compassion inform the module content

Students will practice a range of skills within this module such as communication and sensory processing as well as technology. Students will have opportunity in placement experience to demonstrate knowledge, understanding and application of basic pharmacology to medicines administered and clinical practice, (BiNE, LO9 & 10)

Skills will be developed through simulation and practice. A detailed mapping tool provides information for nursing students on the NMC annexes to be covered in this module. Preload will include group facilitation, mental health, health determinants, engagement principles. Theory underpinning resilience, risk, vulnerability and relationships across the lifespan. Contemporary research underpinning current practice including adverse childhood experiences. Policies, guidance and legislation which relate to individual, community and environmental resilience.

Personal resilience and enhancing personal protective factors. Examples of areas which can be explored can include: relationships and attachment, self- compassion, taking risks, problem solving and cultural and emotional competence Individual resilience and vulnerability in health and social care: hope, purpose, security, attachment and loss

Community resilience and vulnerability in health and social wellbeing. Examples of areas which can be explored: assets, systems and inclusion

Risk in healthcare and social care. Examples of areas which can be explored include: self-management and managing risk, informed decision making, empowerment and enablement, concordance and independent living

Enhancing protective factors and recovery. Examples of areas that can be explored include: education, health Literacy, technology, therapeutic interventions, community and personal assets, spirituality, environmental adaptation

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Demonstrate evidence of achievement of the required standards of proficiency associated with your professional discipline.

Employability Skill	s and Personal Development Planning (PDP) Skills					
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:					
Knowledge and	SCQF 8					
Understanding (K and U)	Critical understanding of the influencing factors which leads to the development of risk and resilience, in particular the assessment of risk in a range of populations across the lifespan and within a variety of social and cultural groups.					
	Risk assessment tools.					
	Public policy and research relating to vulnerability					
Practice: Applied	SCQF 8					
Knowledge and Understanding	Use a range of skills techniques and practices suitable for working collaboratively with a range of people who are vulnerable.					
	Reflect on the potential impact of a resilient healthcare and social care workforce in supporting safe, compassionate, person-centred care					
Generic	SCQF 8					
Cognitive skills	Discuss research methodologies in relation to practice improvement.					
	Apply discussion of the literature in relation to professional ethical and legal issues recognising the implications for practice.					
	Discuss concepts of dignity, compassion, risk resilience, and holistic care across the lifespan.					
Communication,	SCQF 8					
ICT and Numeracy Skills	Demonstrate a range of strengths-based approaches to assess people's needs and enable resilience in individuals' communities and health and social care environments.					
	Use a range of digital technology and numeracy skills to interpret and manipulate data					
Autonomy,	SCQF 8					
Accountability and Working with Others	Use reflective skills to develop a deeper understanding of self-awareness and awareness of others.					
	Take responsibility for self-reflection and respond positively to feedback to develop professional knowledge and skills.

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

The module consists of a 6 week theoretical component and an 8-week placement component. The theoretical component will be taught through a range of tutorial, classroom

and online approaches. The learning and teaching strategies applied to this module contribute towards the development of UWS graduate attributes as outlined in "I am UWS" See link: https://www.uws.ac.uk/current-students/your-graduate-attributes/ Specifically it will assist on enhancing critical thinking, effective communication and emotional and cultural intelligence. Module hours exceed the norm because of the practice learning element.

Learning Activities During completion of this module, the learning activities undertaken	Student Learning Hours	
to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)	
Lecture / Core Content Delivery	12	
Tutorial / Synchronous Support Activity	6	
Laboratory / Practical Demonstration / Workshop	36	
Practice-based Learning	320	
Asynchronous Class Activity	18	
Independent Study	68	
TOTAL	460

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

100% attendance is expected in this module. If your attendance falls below 80%, you will be contacted, in adherence to the 24/25 UWS Student Attendance and Engagement Procedure, and may be asked to agree a re-engagement support plan.

Where a module has Professional, Statutory or Regulatory Body requirements these will be listed here: 100% attendance in Practice Placement areas is required by the end of the programme to meet NMC requirements.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: <u>UWS Equality, Diversity and Human Rights Code.</u>

This module is appropriate for all students. In line with current legislation (Equality Act, 2010) and the UWS Equality, Diversity, and Human Rights Code, our modules are accessible and inclusive, with reasonable adjustment for different needs where appropriate. To promote inclusive practice, procedures and processes have been subject to Equality Impact Assessment where appropriate. In line with the Equality Act 2010 and UWS Refreshed Equality Outcomes 2021 - 2025 Public Sector Equality Duty Mainstreaming and Equality Outcomes Report 2021 (uws.ac.uk) (pp. 37 - 39) the School of Health and Life Sciences encourages the disclosure of support requirements, including disability, at the recruitment stage and throughout the duration of the module. Emphasis is placed on confidentiality of information, the benefits of disclosure, and that no detriment to progress will be experienced. The School will endeavour to make reasonable adjustments to teaching and

learning approaches and arrangements for assessment, and (when applicable) periods of placement, where appropriate.

All learning materials, activities and scenarios will utilise a diverse range of patients to reflect the diversity of students.

Professional programmes have Standards of Proficiency which detail the knowledge, skills and understanding required to be met to permit professional registration to be able to practise safely and effectively in the profession. As an education provider for this professional programme, UWS is not able to adjust these standards. However, we can make reasonable adjustments to assist students in meeting these standards.

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
