

Module Descriptor

Title	Human Physiology					
Session	2024/25	Status				
Code	BIOL09003	SCQF Level	9			
Credit Points	20	ECTS (European Credit Transfer Scheme)	10			
School	Health and Life Sciences					
Module Co-ordinator	Andrew MacKenzie					

Summary of Module

This module extends and develops material delivered on the key physiological areas of nervous, cardiovascular, respiratory, renal and digestive systems at Level 8. Fundamental physiological principles in each of the systems are consolidated, laying foundation for the further development of these subjects in the Level 10 'Biology of Disease' module.

The nervous system includes discussion of the autonomic nervous system and motor and sensory pathways.

The cardiovascular system overviews cardiac output, vascular regulation, blood pressure and capillary exchange.

The respiratory system includes discussion of gas transfer, respiratory mechanics and lung capacities.

The renal system includes outlines urine formation (glomerular filtration and tubular processing), urine concentrating mechanisms and renal control.

The digestive system overviews the processes of ingestion, digestion, absorption and defecation and includes discussion of the associated accessory structures.

As appropriate, examples of integration between these systems will be presented and pathophysiological illustrations used.

This module will work to develop a number of the key "I am UWS" Graduate Attributes to those who complete the module. Details are provided later in descriptor.

Module Delivery Method	On-Camp	ampus ¹		Hybrid ²	Online ³		Wor Le	rk -Based earning⁴ □
Campuses for Module Delivery	Ayr Dumfries			Lanarks	 Online / Distance Learning Other (specify) 			
Terms for Module Delivery	Term 1	Term 1		Term 2		Term	13	
Long-thin Delivery over more than one Term	Term 1 – Term 2			Term 2 – Term 3		Term Term	13– 11	

Lear	ning Outcomes
L1	Describe in detail the normal structure and function of key human physiological systems (comprising the nervous, cardiovascular, respiratory, renal and digestive systems).
L2	Explain principal control mechanisms of key human physiological systems (comprising the nervous, cardiovascular, respiratory, renal and digestive systems) and, where appropriate, disturbances to this control.
L3	Report on aspects of key human physiological systems (comprising the nervous, cardiovascular, respiratory, renal and digestive systems) through analysis of laboratory-based results and data.
L4	
L5	

Employability Skills and Personal Development Planning (PDP) Skills					
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:				
Knowledge and Understanding (K and U)	SCQF 9 Developing general and integrated understanding of major physiological systems in humans, including fundamental concepts and specialised terminology (Graduate Attribute-Successful-Professional-driven). Self- evaluation of information derived from experiment to determine priority value of data (Graduate Attribute-Universal-Academic-critical thinking)				

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Practice: Applied	SCQF 9				
Knowledge and Understanding	Trained to apply skills and techniques important in monitoring basic physiological parameters (blood pressure; urinalysis; etc). Aptitude in collecting data from human volunteers (Graduate Attribute-Universal- Personal-ethically minded). Constructing dose-response curves using standard pharmacological preparations.				
Generic	SCQF 9				
Cognitive skills	Developing a working hypothesis; designing an experiment to test hypothesis (Graduate Attribute-Work Ready-Academic-problem solver); analysing data to accept / reject hypothesis. Performing routine urinalysis and interpreting the results. Investigating the cardio response to static vs. dynamic exercise.				
	Evaluating histology specimens to identify with supporting rationale				
Communication,	SCQF 9				
ICT and Numeracy Skills	Data analysis and tabular/graphical presentation of data collected during laboratory (Graduate Attribute-Successful-Academic- autonomous) and exercise mini-project assignment. IT communication with student peers as part of group cohesion in mini-project assignment (Graduate Attribute-Work Ready-Personal effective communicator).				
Autonomy,	SCQF 9				
Accountability and Working with Others	Develop the ability to work productively as part of an integrated group to perform and monitor the body's responses to exercise, to analyse the resulting data and form part of a group presentation. Assume responsibility for delegated component of integrated work (Graduate Attribute-Universal-Professional collaborative).				

Prerequisites	Module Code BIOL08003	Module Title Human Biology			
	Other BIOL08019 Core Biomedical Science OR BIOL 08001 Vertebrate Physiology, depending upon programme of study, or suitable equivalent.				
Co-requisites	Module Code	Module Title			

Learning and Teaching						
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.						
Learning Activities	Student Learning Hours					
to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)					
Lecture / Core Content Delivery	25					
Tutorial / Synchronous Support Activity	5					
Laboratory / Practical Demonstration / Workshop	6

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Lecture notes, PowerPoint slides, audio-recordings, etc, access via VLE

Further indicative resources and relevant module information (announcements; timetable; staff contact details etc) available via module VLE site

Recommended text:

Martini, F.H (2016) Essentials of Anatomy & Physiology, 7th Edition (Pearson)

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, courserelated learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

Attendance at all sessions (lectures, tutorials and practicals), completion of any online activities, and submission of assessments to meet the learning outcomes of the module.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: <u>UWS Equality, Diversity and Human Rights Code.</u>

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)

Supplemental Information

Divisional Programme Board	Biological Sciences Health
Overall Assessment Results	🗌 Pass / Fail 🔀 Graded
Module Eligible for	Yes No
Compensation	If this module is eligible for compensation, there may be cases where compensation is not permitted due to programme accreditation requirements. Please check the associated programme specification for details.
School Assessment Board	Biology L7-11
Moderator	Robin Freeburn

External Examiner	
Accreditation Details	This module is part of the BSc (Hons) Biomedical Science programme; accredited by Institute of Biomedical Science (IBMS). This module is part of the BSc (Hons) Applied Bioscience programme; accredited by Royal
	Society of Biology (RSB). This module is part of the BSc (Hons) Environmental Health with Professional Practice programme; accredited by The Royal Environmental Health Institute of Scotland (REHIS).
Module Appears in CPD	Yes 🛛 No
catalogue	
Changes / Version Number	3.13
	Minor updates to wording, clarification of assessment outcomes

Assessment (also refer to Assessment Outcomes Grids below)

Assessment 1

Coursework (50%) derived from laboratory reports and data analysis, in form of abstracts, posters, short practical reports, histology identification tables.

Assessment 2

Written class test (50%) in form of essays from a choice of questions.

Assessment 3

(N.B. (i) Assessment Outcomes Grids for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed.

(ii) An indicative schedule listing approximate times within the academic calendar when assessment is likely to feature will be provided within the Student Module Handbook.)

Component 1							
Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
coursework	\square	\square	\square			50	0

Component 2							
Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
class test						50	0

Component 3							
Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours

Combined total for all components						100%	hours
