

Module Descriptor

Title	Bio-Case Study					
Session	2025/26	Status	Published			
Code	BIOL09009	SCQF Level	9			
Credit Points	20	ECTS (European 10 Credit Transfer Scheme)				
School	Health and Life Sciences					
Module Co-ordinator	Fiona Menzies					

Summary of Module

This module will involve students researching a "controversial" aspect of bioscience. The final report will be produced on the topic that will outline both sides of the argument with a discussion that debates the situation to arrive at a conclusion that supports one side of the argument. This will include planning the report, and producing a draft. Throughout the module students will be shown the competencies needed to generate a professional quality report. This will be undertaken as a structured series of 'generic' sessions to encourage semi-independent working on variety of skills: correct citation of references, extracting information from a variety of databases, correct use of English and academic writing skills, plagiarism and ethics. Throughout the module there will be developmental targets that the student will have to meet to indicate adequate progression towards the final report. Students will normally undertake unique topics relating to their sphere of interest. Regular attendance is required and will be recorded in order to determine engagement in the module. The intention is that this module will help students develop their research and writing skills essential for writing competent reports and dissertations and improve graduate level employment.

Module Delivery Method	On-Campus¹	Hybrid²	Online ³		Work -Based Learning⁴
Campuses for Module Delivery	Ayr Dumfries	✓ Lanarks✓ London✓ Paisley	hire	Learr	nline / Distance ning Other (specify)

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Lear	ning Outcomes
L1	To plan, collect, interpret and critically evaluate the information contained within appropriate scientific publications.
L2	To produce and present a report to a professional standard that considers a controversial topical issue.
L3	
L4	
L5	

Employability Skills and Personal Development Planning (PDP) Skills					
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:				
Knowledge and Understanding (K	SCQF 9				
and U)	The production of the report and associated activities will provide an opportunity for monitored independent learning on a specialist bioscience topic.				
Practice: Applied	SCQF9				
Knowledge and Understanding	Students will develop competency in the extraction of information from scientific databases and other reputable sources and develop interpretational skills together with practice in the presentation of the appropriate referenced material.				
Generic	SCQF9				
Cognitive skills	Students will produce a final report and presentation that will refine report writing and analytical skills towards the level of a professional standard.				
Communication,	SCQF9				
ICT and Numeracy Skills	Students will have the opportunity to enhance their communication, ICT and data handling skills through production of written reports, and presentations.				
Autonomy,	SCQF9				
Accountability and Working with Others	Although tutors supervise students throughout the module, it is designed to develop a supported, but increasing level of autonomy in the production of a quality report. Students will be responsible for timely production of assessed work, developing time management and organizational skills.

Co-requisites	Module Code	Module Title

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

Students will review a scientific paper (20%), prepare and deliver a presentation (20%) and write a report (60%)

Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	Student Learning Hours (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	18
Tutorial / Synchronous Support Activity	18
Independent Study	164

TOTAL	200

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Success in academic writing / Trevor Day. Basingstoke: Palgrave, 2018. Available online http://www.vlebooks.com/Vleweb/Product/Index/2024962?page=0

Recorded presentations and resources on the module VLE site

Use of databases such as World of Knowledge, Science Direct

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

The university is committed to providing a supportive learning environment that actively facilitates student success. In this module, there is a high degree of student-led flexibility. You are academically engaged if you are regularly engaged with scheduled live sessions oncampus and online, including engaging with online learning activities in your own time, course-related learning resources, and with timely completion and submission of assessments.

Whilst we understand that there may be times when conflicting priorities make participation challenging, for you to gain the most from this module it is recommended that you participate in all scheduled live classes and complete your self-directed learning activities in a timely manner.

It may be difficult to pass the assessment associated with this module if you are not regularly engaging with the module work and live classes. We may reach out to check how things are going and offer support if we observe that you have not been attending sessions or completing online activities.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: <u>UWS Equality</u>, <u>Diversity and Human Rights Code</u>.

In line with current legislation (Equality Act, 2010) and the UWS Equality, Diversity, and Human Rights Code, our modules are accessible and inclusive, with reasonable adjustment for different needs where appropriate. Module materials comply with University guidance on inclusive learning and teaching, and specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and regulations. Where modules require practical and/or laboratory based learning or assessment required to meet accrediting body requirements the University will make reasonable adjustment such as adjustable height benches or assistance of a 'buddy' or helper.

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)

Supplemental Information

Divisional Programme Board	Biological Sciences Health
Overall Assessment Results	☐ Pass / Fail ☐ Graded
Module Eligible for Compensation	Yes No If this module is eligible for compensation, there may be cases where compensation is not permitted due to programme accreditation requirements. Please check the associated programme specification for details.
School Assessment Board	Biology
Moderator	Richard Thacker
External Examiner	A Tsaousis
