

Module Descriptor

Title	Entomology & Parasitology		
Session	2024/25	Status	Published
Code	BIOL09013	SCQF Level	9
Credit Points	20	ECTS (European Credit Transfer Scheme)	10
School	Health and Life Sciences		
Module Co-ordinator	Richard Thacker		

Summary of Module

This module is concerned with interactions between invertebrate species and mankind. The specific emphasis in the module is on species that are inimical to mankind as crop pests, vectors of disease and/or species that cause disease in their own right. The module is split equally between considerations of entomology and parasitology. Entomological studies begin with a review of insect biodiversity and then look in detail at insect feeding, insect growth and development and insect ecological characteristics. Human attempts to manage or control insect pest species are then considered including chemical control, biological control and genetic methods. The focus in parasitology is on diseases caused by bacteria, protozoa, trematodes and cestodes. Biological characteristics of parasites and clinical diagnosis of disease are considered along with approaches to the treatment of disease. The module is taught using a blend of lectures, tutorials and laboratory practical experiments. The module specifically develops the UWS graduate attributes that are associated with critical thinking, analysis, and becoming research minded.

Develop a knowledge of the diversity of insect species.

Understand the different approaches to managing pest species.

Develop a knowledge of major diseases caused by parasites.

Understand the approaches to the treatment of parasitic diseases.

Module Delivery Method	On-Campus ¹	Hybrid ²	Online ³	Work -Based Learning ⁴
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Learning Outcomes	
L1	Describe the range of insect biodiversity, insect growth and development, insect feeding and basic ecological characteristics of species using the r-K continuum.
L2	Identify and discuss the main interactions between insects and mankind and attempts to minimize their inimical impacts using various control methods (chemical, biological, genetic).
L3	Outline protozoan and helminth life cycles and how parasite metabolism adapts to survive in different hosts.
L4	Describe the interactions of protozoan and helminth organisms with mankind, particularly in relation to disease and in relation to clinical features associated with diseases caused by these organisms.
L5	Describe the concept of One Health as it relates to disease

Employability Skills and Personal Development Planning (PDP) Skills	
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:
Knowledge and Understanding (K and U)	SCQF 9 Describe the interactions of protozoan and helminth organisms with mankind, particularly in relation to disease and in relation to clinical features associated with diseases caused by these organisms.
Practice: Applied Knowledge and Understanding	SCQF 9 Use and/or describe some of the techniques that are utilized to minimize the impacts of invertebrate species on mankind
Generic Cognitive skills	SCQF 9 Identify and analyse problems caused by invertebrates and describe basic approaches to the amelioration of these problems
Communication, ICT and Numeracy Skills	SCQF 9 Interpret and evaluate numerical data using basic statistical techniques and present the results of such evaluation in graphical and written reports
Autonomy, Accountability and Working with Others	SCQF 9 Exercise autonomy and initiative and work with others when undertaking practical laboratory work associated with the identification and management of invertebrate pest species

Learning and Teaching	
In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.	
Learning Activities During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	Student Learning Hours (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	24
Laboratory / Practical Demonstration / Workshop	12
Tutorial / Synchronous Support Activity	12
Independent Study	152
Please select	
Please select	
TOTAL	200

Indicative Resources
The following materials form essential underpinning for the module content and ultimately for the learning outcomes: Textbook: Entomology & Pest Management (2021). Pedigo, L.P., Marlin, E.R., Krell, K.K. 7 th Edition Textbook: Parasitology: An Integrated Approach (2022). Gunn, A., Pitt, S.J.
(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements
In line with the Student Attendance and Engagement Procedure , Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time. For the purposes of this module, academic engagement equates to the following: Attendance on-campus at all classes

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: [UWS Equality, Diversity and Human Rights Code](#).

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)

Assessment (also refer to Assessment Outcomes Grids below)**Assessment 1**

Class Essays

Assessment 2

Research Exercise and Quiz

Assessment 3

(N.B. (i) Assessment Outcomes Grids for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed.

(ii) An indicative schedule listing approximate times within the academic calendar when assessment is likely to feature will be provided within the Student Module Handbook.)

Component 1

Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
Class Essays	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	60	3

Component 2

Assessment Type	LO1	LO2	LO3	LO4	LO5	Weighting of Assessment Element (%)	Timetabled Contact Hours
