Title	Environmental Responsibilities					
Session	2024/25	2024/25 Status Published				
Code	CEWM09004	SCQF Level	9			
Credit Points	20	ECTS (European Credit Transfer Scheme)	10			
School	Health and Life Sciences					
Module Co-ordinator	Chris Seyfried					

Summary of Module

The focus of this module is awareness-building in environmental management, workplace waste minimisation and environmental management systems. Establishing a basis for effective environmental management begins with an understanding of the statutory framework within which a business operates. This leads to the business itself and the responsibilities on both employer and employee to maintain environmental standards. An overview of environmental issues and their potential impacts on the environment, and on the workforce, sets the stage for a study of both physical and managerial control methods. Processes and their potential for hazard and waste in the workplace can then be considered in context. Cleaner production and waste minimisation programmes lead to improvements in processes, compliance with regulations and overall management of the environment.

This module allows students to use a variety of skills such as investigations, identification of appropriate legislation through data searches and delivering information, both oral and written, to peers and senior members of staff, all part of the 'I am UWS' Graduate Attributes.

Universal – development of critical thinking, ethically and research minded.

Work Ready – an effective problem solver, communicator and ambitious.

Successful – by being autonomous, resilient and driven.

Module Delivery	On-Campus ¹	Hybrid ²	Online ³	Work -Based
Method				Learning⁴

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Long-thin Delivery over more than one Term	Term 1 – Term 2		Term 2 – Term 3		Term 3 – Term 1	

Lear	ning Outcomes
L1	Identify, analyse and apply management principles to hazards in the environment and advise on good management practice relating to environmental issues
L2	Communicate environmental issues and practices in a form that would be appropriate for all levels of employees and senior management
L3	Demonstrate detailed knowledge of the component parts of environmental management systems such as ISO14001
L4	
L5	

Employability Skills and Personal Development Planning (PDP) Skills					
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:				
Knowledge and	SCQF9				
Understanding (K and U)	Critically review current relevant environmental legislation				
,	Demonstrate a broad knowledge and understanding of environmental management in the workplace				
Practice: Applied	SCQF9				
Knowledge and Understanding	Synthesise information from a number of sources in order to gain a coherent understanding of theory and practice in relation to environmental protection				
	Use a range of skills and techniques to investigate professional problems within the workplace				
Generic	SCQF9				
Cognitive skills	Apply strategies for the appropriate selection of relevant information from a wide source and large body of knowledge				
	Apply the skills needed for academic study and enquiry				
Communication,	SCQF 9				
ICT and Numeracy Skills	Be able to convey complex technical information using oral and written presentations, using IT as required				
Autonomy,	SCQF 9				
Accountability	Work in support of current professional practice under guidance				

and Working with	Take the lead in planning work as part of a group to analyse information
Others	and manage the outcome

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

Learning Activities During completion of this module, the learning activities undertaken	Student Learning Hours
to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)
Laboratory / Practical Demonstration / Workshop	32
Tutorial / Synchronous Support Activity	6
Independent Study	164

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Virtual Learning Environment: Timetables, lecture summaries, seminar, assignments, staff contact information and other information associated with the running of the Module.

International and UK Standards, eg ISO14001, EMAS available from the Barbour Index database available from UWS Library On-line data bases www.sepa.org.uk www.hse.gov.uk www.netregs.gov.uk www.defra.gov.uk www.sepa.org.uk

Referencing: Pears, R. and Shields, G. (2019) Cite them right: the essential referencing guide. 11th rev. edn.

London: Red Globe Press. Print and electronic copies are available from UWS Library.

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled on-

campus and online teaching sessions, asynchronous online learning activities, courserelated learning resources, and complete assessments and submit these on time. For the purposes of this module, academic engagement equates to the following:

Students must attend all lectures either online or in person
