

Module Descriptor

Title	Essentials of De	mentia Care	
Session	2024/25	Status	
Code	NURS09229	SCQF Level	9
Credit Points	20	ECTS (European Credit Transfer Scheme)	10
School	Health and Life Sciences		
Module Co-ordinator	Stephen Holmes		

Summary of Module

This module aims to equip health and social care professionals with the essential knowledge and understanding required to provide optimal evidence-based care and support to people with dementia and their families and friends (significant others).

The module begins by exploring our current understanding of dementia, an umbrella term for a cluster ofprogressive conditions that affect the brain. The module reviews current evidence in the care and support ofpeople with dementia from diagnosis to death and the care and support required by their significant others. Interactive elements of learning will enable students to apply theoretical content to their own practice and thatof others to allow them to evaluate the challenges that may prevent the provision of evidence based care topeople with dementia and their significant others. Engaging in interactive learning will enable students to bework ready and successful in their career as well as becoming critically thinking graduate.

The module will support health and social care professionals from anywhere in the world and within any caresettings in understanding the compexity of dementia through interactive learning activities allowing learners toapply current best practice ideologies to their own role in the workplace. This promotes global citizenship.

This module is fully theoretical and does not have any placements.

Module Delivery	On-Campus ¹	Hybrid ²	Online ³	Work -Based
Method				Learning⁴
]	

¹ Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

² The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

³ Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

⁴ Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

Lear	rning Outcomes
L1	Discuss in depth our current understanding of dementia and how this illness challenges society, individuals and service providers.
L2	Critically analyse and evaluate best practice in the diagnosis, care and support of people with dementiaand their significant others.
L3	Apply theoretical learning to professional practice to deliberate how evidence based care and support canimprove the care provided to people with dementia and their significant others.
L4	
L5	

Employability Skill	s and Personal Development Planning (PDP) Skills
SCQF Headings	During completion of this module, there will be an opportunity to achieve core skills in:
Knowledge and	SCQF9
Understanding (K and U)	Knowledge of current dementia strategies and policies.
and Gy	Understanding of the different types of dementia and how these are diagnosed.
	Knowledge and understanding of the impact that a variety of evidence basedapproaches can have to the provision of care and support to those with dementiaand their significant others.
Practice: Applied	SCQF9
Knowledge and Understanding	Explaining how the use of strategies and policies can improve the care and support to people with dementia and their significant others.
	Debating the challenges that are inherent in providing evidence based dementiacare in health and social care practice.
	Applying theoretic content to own practice and that of others to promote evidencebased practice in dementia care.
Generic	SCQF9
Cognitive skills	Identifying societal and healthcare challenges impact on the care and supportprovided to people with dementia and their significant others.
	Critically reviewing the care and support received by the person with a dementiaand their significant others and discussing how the care and support could beenhanced using evidence based approaches.

Communication,	SCQF9
ICT and Numeracy Skills	Improving communication within the care team to ensure evidence baseddementia care is understood by all.
	Developing further library, e-library and on-line searching and retrieval skills.
	Improving word processing and spreadsheet usage skills.
Autonomy,	SCQF9
Accountability and Working with	Promoting the use of current best practice in dementia care.
Accountability and Working with Others	Promoting the use of current best practice in dementia care. Working effectively with others to provide evidence based care for people with dementia and their significant others.

Learning and Teaching

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

This module will be delivered by hybrid learning, which optimises both online transmission and on campus tutorials. The module is also delivered online by e-learning.

Students will participate in a wide range of classroom activities which will include lectures, tutorials, discussion, group activities and problem-based learning activities which cover the core quality assured resources received by on-line students. These will be hosted on the module virtual learning environment (VLE). They have access to direct individual and tutorial support from their tutors, will participate in asynchronous discussions, and will be directed to wider reading including access to electronic library and books.

Students supported on-line via the VLE will receive: Core quality assured module resources; individual andgroup tutorial support by email; synchronous and a-synchronous discussion; directed wider reading including access to electronic library and e-books.

Blended learning students will attend classes but less frequently than in in the face to face delivery. Learning will be support by: the VLE core quality assured module resources; individual and group tutorial support byemail; synchronous and a-synchronous discussion; directed wider reading including access to electronic libraryand e-books.

Learning Activities	Student Learning
During completion of this module, the learning activities undertaken	Hours
to achieve the module learning outcomes are stated below:	(Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	20
Tutorial / Synchronous Support Activity	10
Independent Study	158
Asynchronous Class Activity	6

Personal Development Plan	6

Indicative Resources

The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

Andrews, J. (2015) Dementia: The one-stop guide: Practical advice for families, professionals and people livingwith dementia and Alzheimer's disease. London: Profile Books.

Jackson, G.. and Tolson, D. Eds. (2019) Textbook of dementia care: an Integrated Approach. London:Routledge.

Jenkins, C., Keenan, B. and Ginesi, L. (2016) Dementia care at a glance. Chichester: John Wiley.

Rahman, S. and Howard, R. (2018) Essential of Dementia: Everything you really need to know for working indementia care. London: Jessica Kingsley.

Scottish Social Services Council/NHS Education Scotland (2016) Dementia Skilled Improving Practice. Online, available at:

https://www.nes.scot.nhs.uk/media/3558858/Dementia%20Skilled%20Resource%202016% 20-FINAL-web.pdf

In addition to these texts students will be directed to a wide range of international, national and local resourcesto support the module content and learning outcomes.

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk*) to wait until the start of session for confirmation of the most up-to-date material)

Attendance and Engagement Requirements

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

Where a module has Professional, Statutory or Regulatory Body requirements these will be listed here: Attendance at synchronous sessions (lectures, workshops, tutorials, completion of asynchronous activities, and submission of assessments to meet the learning outcomes of the module.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code.

In line with current legislation (Equality Act, 2010) and the UWS Equality, Diversity, and Human Rights Code, our modules are accessible and inclusive, with reasonable adjustment for different needs where appropriate. Module materials comply with University guidance on inclusive learning and teaching, and specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and regulations. Where modules require practical and/or laboratory based learning or assessment required to meet accrediting body requirements the University will make

Please refer to the UWS Equality and Diversity Policy

Assessment (also refer to Assessment Outcomes Grids below)
Assessment 1
Students will use case studies of individuals of different ages with dementia and produce a written piece ofwork which will focus on diagnosis, care and support of the person, their families and wider support networkusing evidenced-based care.
Assessment 2
Students will produce an electronic poster demonstrating their current understanding of dementia and how thisillness challenges society, individuals and service providers.
Assessment 3
(N.B. (i) Assessment Outcomes Grids for the module (one for each component) can be found below which clearly demonstrate how the learning outcomes of the module will be assessed.
(ii) An indicative schedule listing approximate times within the academic calendar when
