

## **Module Descriptor**

Title	Consolidating Adult Nursing Care				
Session	2025/26	Status	Published		
Code	NURS09255	SCQF Level	9		
Credit Points	20	ECTS (European Credit Transfer Scheme)	10		
School	Health and Life Sciences				
Module Co-ordinator	Claire Brew				

## **Summary of Module**

Consolidating Approaches to Adult Nursing Care is a module focusing on safe, personcentred evidence-based practice. Students will consolidate knowledge, skills and professional behaviours required for effective nursing practice within a range of healthcare settings, with a clear focus on the NMC (2023), Standards Framework for nurse education.

By using a range of simulated authentic scenarios students will apply up to date evidence, critical thinking and decision-making skills to a group of patients, equipping the student to lead and prioritise care delivery through effective assessing, planning, implementing and evaluating holistic person-centred care. This includes the provision of care to meet the psychosocial needs of the person. In this module, students will complete Part 3 of 'Discover Dementia' which completes achievement of the skilled level of the Promoting Excellence Framework.

The module content reflects current NMC proficiencies required for registration as an Adult Nurse. Specifically, annexe A & B skills for this module are embedded in the teaching and delivery.

Students will consolidate their knowledge and understanding of pharmacology, mechanisms of intravenous drug interactions and adverse drug reactions to provide safe holisitc nursing care.

The module will also equip the student to develop, demonstrate and utilise appropriate graduate attributes, including management skills and applying quality improvement strategies to healthcare delivery.

Formative opportunities will be provided during this module in a variety of mechanisms which may include: feedback on classroom-based activities from academics and/or peers, feedback on performance of nursing skills and procedures, feedback on assessment plans or short pieces of formative work and feedback from wider university support services (e.g. Academic skills team).

Educate students to apply the principles of assessment and effective decision making to manage and deliver holistic care in a variety of settings underpinned by critical thinking and prioritisation of skills to deliver evidence based care to a person with complex care needs. Application of knowledge of pathophysiology to a range of conditions to effectively manage delivery of holistic nursing care. This module contributes to the UN Sustainable Development Goals (SDGs) (2023) SDG 3 Good Health and Wellbeing, SDG - 4 and Quality Education, whilst also aligning to the graduate attributes of UWS; universal, work-ready and successful.

<sup>&</sup>lt;sup>1</sup> Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

<sup>&</sup>lt;sup>2</sup> The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

<sup>&</sup>lt;sup>3</sup> Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

<sup>&</sup>lt;sup>4</sup> Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

	Consolidating adult nursing care for a person with frailty.
	Consolidating adult nursing care of the person receiving palliative care and/or end of life care.
	Consolidating adult nursing care of the person requiring rehabilitation care.
Practice: Applied	SCQF9
Knowledge and Understanding	Prioritisation of adult nursing care
Ondorstanding	Effective team management and leadership skills in relation to clinical scenarios
	Apply clinical decision making and reasoning skills
	Assessment and evaluation of care needs and interventions
Generic	SCQF 9
Cognitive skills	Critical decision making
	Apprasial and evaluation skills
	Clinical reasoning skills
	Synthesis of reflection skills
Communication,	SCQF 9
ICT and Numeracy Skills	Effectively use a range of communication skills, digital technologies and a range of numeracy skills that support safe, holistic nursing care.
Autonomy,	Please select SCQF Level
Accountability and Working with	Practice independantly within the role of a Part 3 student nurse.
Others	Engage in peer learning and feedback to develop a range of skills towards progressing to NMC registration.
	Practice autonomously, working within legal, ethical and professional boundaries.
	Demonstrate effective time management and leadership skills in delivery of safe holistic nursing care.
	Recognising and knowing how, when and why to respond to the complexities in the delivery of holistic nursing care.

## **Learning and Teaching**

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

You will be taught through a combination of lectures, tutorials, workshops and, if part of this module, guided activity in our clinical skills laboratories. This will be supported by materials hosted on our virtual learning environment. Your time on campus is also designed to support your professional development as you work towards becoming a Registered Nurse. Group work, role play, and presentations help you to develop the communication, teamworking and leadership skills needed for professional practice.

Learning Activities	Student Learning
During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:	Hours (Note: Learning hours include both contact hours and hours spent on other learning activities)
Lecture / Core Content Delivery	10
Tutorial / Synchronous Support Activity	20
Laboratory / Practical Demonstration / Workshop	18
Personal Development Plan	3
Independent Study	149
n/a	
TOTAL	200

#### **Indicative Resources**

# The following materials form essential underpinning for the module content and ultimately for the learning outcomes:

lfaro-LeFevre, R. (2016) Critical Thinking, Clinical Reasoning and Clinical Judgement. 6th Edn. Florida: Elsevier.

Boyd, C. (2022) Clinical Skills for Nurses (Student Survival Skills), Chichester, Wiley - Blackhall.

Cook, N., Shepherd, A., Dunleavy, S. & McCauley, C. (2022) Essentials of Pathophysiology for Nursing Practice. 2nd edn. London: SAGE Publications.

Ellis, P. Standing, M. and Roberts, S. (2020) Patient Assessment and Care Planning in Nursing. 3rd Ed. London: Sage Publications

Flin, R. Youngson, GG. and Yule, S.(2016) Enhancing Surgical Performance. A Primer in Non-Technical Skills. Florida: Taylor Francis Group.

Harding, M.M. and Snyder, J.S. (2019) Clinical Reasoning Cases in Nursing. 7th Edn. Missouri: Elsevier. Standing, M. (2017) Clinical Judgement and Decision Making in Nursing. 3rd Edn. London: Sage Publications

Perry, A. G, Ostendorf, W., Laplante, N.(2025) Clinical Nursing Skills and Techniques, Eleventh ed, Missouri, Elsevier.

(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk\*) to wait until the start of session for confirmation of the most up-to-date material)

### **Attendance and Engagement Requirements**

In line with the <u>Student Attendance and Engagement Procedure</u>, Students are academically engaged if they are regularly attending and participating in timetabled oncampus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.

For the purposes of this module, academic engagement equates to the following:

The Nursing and Midwifery Council require that students complete 2300 hours of theoretical preparation. Therefore, there is an expectation that all students attend all scheduled

activities associated with the module. This includes on campus and synchronous online activities.

### **Equality and Diversity**

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: <u>UWS Equality, Diversity and Human Rights Code.</u>

This module is appropriate for all students. In line with current legislation (Equality Act, 2010) and the UWS Equality, Diversity, and Human Rights Code, our modules are accessible and inclusive, with reasonable adjustment for different needs where appropriate. To promote inclusive practice, procedures and processes have been subject to Equality Impact Assessment where appropriate. In line with the Equality Act 2010 and UWS Refreshed Equality Outcomes 2021 - 2025 Public Sector Equality Duty Mainstreaming and Equality Outcomes Report 2021 (uws.ac.uk) (pp. 37 - 39) the School of Health and Life Sciences encourages the disclosure of support requirements, including disability, at the recruitment stage and throughout the duration of the module. Emphasis is placed on confidentiality of information, the benefits of disclosure, and that no detriment to progress will be experienced. The School will endeavour to make reasonable adjustments to teaching and

learning approaches and arrangements for assessment, and (when applicable) periods of placement, where appropriate.

All learning materials, activities and scenarios will utilise a diverse range of patients to reflect the diversity of students.

Professional programmes have Standards of Proficiency which detail the knowledge, skills and understanding required to be met to permit professional registration to be able to practise safely and effectively in the profession. As an education provider for this professional programme, UWS is not able to adjust these standards. However, we can make reasonable adjustments to assist students in meeting these standards.

The Nursing and Midwifery Council (2019) have additional information regarding reasonable adjustments which can be found here: https://www.nmc.org.uk/supporting-information-on-standards-for-student-supervision-and-assessment/student-empowerment/what-to-expect/reasonable-adjustments-if-applicable/

(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)
