

## Module Descriptor

<b>Title</b>	Clinical Genetics		
<b>Session</b>	2024/25	<b>Status</b>	Published
<b>Code</b>	BIOL10018	<b>SCQF Level</b>	10
<b>Credit Points</b>	20	<b>ECTS (European Credit Transfer Scheme)</b>	10
<b>School</b>	Health and Life Sciences		
<b>Module Co-ordinator</b>	Amelie Juin		
<b>Summary of Module</b>			
<p>This module will take an in depth look at the molecular basis, screening, investigation and treatment of genetic diseases. The course will cover broad aspects of genetics which relate to medical technologies and diagnostics but will also cover relevant areas of basic human genetics to ensure students gain a comprehensive overview of the role of genetics in human disease.</p> <p>It will give the students an excellent grounding in human genomics and the new technology developments in clinical genetics which underpin medical treatments and screening programmes. It aims to explore the effects of mutation and variation in the current techniques used in NHS genetics laboratory diagnostics and recent technological developments in diagnostics such as microarray analysis and next-generation sequencing.</p>			

<b>Module Delivery Method</b>	<b>On-Campus<sup>1</sup></b>	<b>Hybrid<sup>2</sup></b>	<b>Online<sup>3</sup></b>	<b>Work -Based Learning<sup>4</sup></b>

<b>Terms for Module Delivery</b>	Term 1 <input type="checkbox"/>	Term 2 <input checked="" type="checkbox"/>	Term 3 <input type="checkbox"/>	

<sup>1</sup> Where contact hours are synchronous/ live and take place fully on campus. Campus-based learning is focused on providing an interactive learning experience supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus contact hours will be clearly articulated to students.

<sup>2</sup> The module includes a combination of synchronous/ live on-campus and online learning events. These will be supported by a range of digitally-enabled asynchronous learning opportunities including learning materials, resources, and opportunities provided via the virtual learning environment. On-campus and online contact hours will be clearly articulated to students.

<sup>3</sup> Where all learning is solely delivered by web-based or internet-based technologies and the participants can engage in all learning activities through these means. All required contact hours will be clearly articulated to students.

<sup>4</sup> Learning activities where the main location for the learning experience is in the workplace. All required contact hours, whether online or on campus, will be clearly articulated to students

<b>Long-thin Delivery over more than one Term</b>	Term 1 – Term 2	<input type="checkbox"/>	Term 2 – Term 3	<input type="checkbox"/>	Term 3 – Term 1	<input type="checkbox"/>
---	-----------------	--------------------------	-----------------	--------------------------	-----------------	--------------------------

<b>Learning Outcomes</b>	
<b>L1</b>	Detailed knowledge and understanding of the genetic basis of selected human genetic diseases.
<b>L2</b>	Critically analyse the investigative and diagnostic techniques used in clinical genetics.
<b>L3</b>	Demonstrate knowledge and understanding of emerging genetic therapies for selected human disease.
<b>L4</b>	To critically discuss the consequences and ethical issues associated with genetic screening and testing at both an individual and population level.
<b>L5</b>	

<b>Employability Skills and Personal Development Planning (PDP) Skills</b>	
<b>SCQF Headings</b>	<b>During completion of this module, there will be an opportunity to achieve core skills in:</b>
<b>Knowledge and Understanding (K and U)</b>	<p><b>SCQF 10</b></p> <p>Demonstrate a broad knowledge in the effects of mutations and genetic variation in human disease.</p> <p>Demonstrate a critical understanding of the principal concepts underpinning current techniques used in NHS genetics laboratory diagnostics.</p>
<b>Practice: Applied Knowledge and Understanding</b>	<p><b>SCQF 10</b></p> <p>Use the theoretical knowledge gained to perform appropriate techniques relevant to genetics and molecular biology.</p> <p>Analyse results in the context of the theoretical underpinning of applying genomic techniques to clinical diagnosis.</p>
<b>Generic Cognitive skills</b>	<p><b>SCQF 10</b></p> <p>Critically analyse the techniques, applications and implications, including ethical issues, of an application of genetic technology in a medical context.</p>
<b>Communication, ICT and Numeracy Skills</b>	<p><b>SCQF 10</b></p> <p>Communicate effectively orally and in writing. Analyse and interpret data where appropriate. Use IT to retrieve information.</p>
<b>Autonomy, Accountability and Working with Others</b>	<p><b>SCQF 10</b></p> <p>Working in teams and individually to perform laboratory work. Research and present information that will require time management, organisational skills and an understanding of professional practice.</p>

<b>Prerequisites</b>	<b>Module Code</b>	<b>Module Title</b>
	<b>Other</b>	
<b>Co-requisites</b>	<b>Module Code</b>	<b>Module Title</b>

**Learning and Teaching**

In line with current learning and teaching principles, a 20-credit module includes 200 learning hours, normally including a minimum of 36 contact hours and maximum of 48 contact hours.

Core theory and concepts will be delivered using formal lectures and tutorials where student participation will be expected. Students will acquire key practical skills by performing techniques use in DNA technology such as PCR and gene cloning in the laboratory sessions. The concepts of these techniques will be reinforced by analysing and presenting the data including answering focused questions on the concept of the techniques. Students will develop skills of computer based information retrieval as they are required to search through relevant databases to retrieve data and generate integrated information about a genetic disorder, as an introduction to the subject of Bioinformatics. Enquiry based learning will be used to explore topical issues in DNA technology from a medical perspective. This will enhance skills of gathering information, critically analysing including ethical issues and presenting it. Working in groups will develop organisational and time management skills.

**Learning Activities**

During completion of this module, the learning activities undertaken to achieve the module learning outcomes are stated below:

**Student Learning Hours**

(Note: Learning hours include both contact hours and hours spent on other learning activities)

Lecture / Core Content Delivery	24
Laboratory / Practical Demonstration / Workshop	6
Tutorial / Synchronous Support Activity	6
Independent Study	164
Please select	
Please select	
<b>TOTAL</b>	<b>200</b>

**Indicative Resources**

**The following materials form essential underpinning for the module content and ultimately for the learning outcomes:**

Medical genetics - An integrated approach. G. Bradley Schaefer, James N. Thompson, Jr. McGraw Hill Education. ISBN-13: 978-0071664387, ISBN-10: 9780071664387

Genetics: A Conceptual Approach (5th Edition). Pierce B. Freeman. ISBN: 9781464109461

New Clinical Genetics (3rd edition). A. Read and D. Donnai. Scion Publishing. ISBN 9781907904677

The module will also make extensive use of up-to-date journal articles in the area of Clinical and Medical genetics, including journal titles such as Nature Review Genetics, Genome Research, PLoS Genetics, American Journal of Human Genetics.

**(N.B. Although reading lists should include current publications, students are advised (particularly for material marked with an asterisk\*) to wait until the start of session for confirmation of the most up-to-date material)**

### **Attendance and Engagement Requirements**

**In line with the [Student Attendance and Engagement Procedure](#), Students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, asynchronous online learning activities, course-related learning resources, and complete assessments and submit these on time.**

**For the purposes of this module, academic engagement equates to the following:**

Where a module has Professional, Statutory or Regulatory Body requirements these will be listed here: In line with the Academic Engagement and Attendance Procedure, Students are defined as academically engaged if they are regularly engaged with timetabled teaching sessions, course-related learning resources including those in the Library and on the VL, and complete assessments and submit these on time. Please refer to the Academic Engagement and Attendance Procedure at the following link: [Academic engagement and attendance procedure](#)

Attendance at synchronous sessions (lectures, workshops and tutorials) completion of asynchronous activities, and submission of assessments to meet the learning outcomes of the module.

### **Equality and Diversity**

**The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: [UWS Equality, Diversity and Human Rights Code](#).**

In line with current legislation (Equality Act, 2010) and the UWS Equality, Diversity, and Human Rights Code, our modules are accessible and inclusive, with reasonable adjustment for different needs where appropriate. Module materials comply with University guidance on inclusive learning and teaching, and specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and regulations. Where modules require practical and/or laboratory based learning or assessment required to meet accrediting body requirements the University will make reasonable adjustment such as adjustable height benches or assistance of a 'buddy' or helper.

**(N.B. Every effort will be made by the University to accommodate any equality and diversity issues brought to the attention of the School)**
