13	Programme Board:	Accounting, Finance and Law
14	Programme Leader:	Dr Attahir Abubakar

15. Admission Criteria

Candidates must be able to satisfy the general admission requirements of the University of the West of Scotland as specified in Chapter 2 of the University Regulatory Framework together with the following programme requirements:

Appropriate Undergraduate Qualifications:

At least an undergraduate degree with 2:2 honours in any subject or equivalent (e.g. bachelor's degree with work experience) awarded by an appropriate institution.

Other Required Qualifications/Experience

Or have a postgraduate award (passed at an appropriate level)

Have an appropriate professional qualification such as those from ACCA or CIMA.

Have passed a Pre Masters programme at a relevant level. In some cases, Accreditation of Prior Learning (APL) and Accreditation of Prior Experiential Learning (APEL) may apply. These are recognised, assessed and implemented within UWS regulations. It considers the use of prior learning as an entrance requirement including entry with advanced standing or as additional credit for the continuing UWS student. The policy aims to provide guidance and clarity to the student.

Where English is not the first language, applicants must be able to satisfy the University of their competence in English in line with the University Regulations.

Further desirable skills pre-application (i.e. to satisfy additional PSRB requirements or other)

IELTS overall score of 6.0 with no element below 5.5, or equivalent UKVI recognised English language

<p>16</p>	<p>General Overview</p> <p>Accounting and Finance is at the heart of every business, and demand for new, qualified talent in this field is exceptionally high. The business landscape is changing all the time due to the development of regulations, technologies and emerging markets, some of which are highly complex and specialized. Employers expect graduates to have advanced skills and insight into contemporary issues like financial technology, responsible business ethics, sustainability, and big data. These contemporary issues are explored in our programme. Further, the programme enhances the research skills of the students, equipping them for independent research at a higher educational level or professional practice.</p> <p>Our programme has been designed for the non-accounting/finance graduate and as such we have not sought accreditation from the professional bodies. However, this strategic and practical course will equip you with the knowledge and skills to succeed in a challenging business environment and you will be able to step into an accounting or finance career in just one year. Completion time for this programme is usually one full time academic year, made up of three terms across 12 months.</p> <p>Based in London, the UK's largest financial centre, you'll be surrounded by some of the world's biggest names in accounting and finance. Immersed in this dynamic business landscape, you will study this complex and rewarding subject in a practical way that prepares you for the next step in your career.</p> <p>You will learn how to:</p> <ul style="list-style-type: none"> • Gain insight and awareness into contemporary issues facing the industry. • Apply financial and accounting skills in a practical context. • Learn how to use established research techniques to create/ collect, analyse and interpret data. • Gain a critical understanding of the theory and practice of accounting and financial management. • Develop competencies that will give high value to the organisations you go on to work for.
<p>17</p>	<p>Graduate Attributes, Employability & Personal Development Planning</p> <p>The MSc aims to provide a robust underpinning in the knowledge, skills and understanding necessary for participants to operate effectively in an accounting or finance area within a variety of international environments. It also develops the research and data analysis competencies of the students.</p> <p>As the MSc has the option to undertake either a Strategic Business Project or the Developing Professional Practice module, there is a great opportunity for students to tailor their MSc to suit their own career aspirations. This flexibility better places the UWS MSc Accounting and Finance graduate to achieve the relevant skills and knowledge to allow them to achieve their desired employment, further education, or professional qualifications.</p>

	<p>Graduates of the MSc will be able to pursue postgraduate research degrees. The Strategic Business Project provides a solid foundation for the Doctor of Business Administration (OBA) and the Doctor of Philosophy (PhD) programmes, and the Developing Professional Practice module is ideal for graduates who wish to pursue the part-time Doctor of Professional Studies (DProf) programme.</p> <p>The location of the programme will assist in attracting industry speakers, as well as significant peer interaction; provide students with networking opportunities and allow them to develop an international network of peers.</p> <p>As a graduate of UWS you will be:</p> <ul style="list-style-type: none"> • Universal - globally relevant with comprehensively applicable abilities, skills and behaviours. • Work ready - dynamic and prepared for employment in complex, ever-changing environments which require lifelong learning and resilience. • Successful - as a UWS graduate with a solid foundation on which to continue succeeding and realising your potential, across various contexts. <p>Through studying and graduating from UWS, you will develop attributes across three dimensions:</p> <ul style="list-style-type: none"> • Academic - knowledge, skills and abilities related to high-level academic study. • Personal - qualities and characteristics of well-rounded, developed, responsible individuals. • Professional - skills, aptitudes and attitudes required for professional working life in the 21st Century.
18	Work Based Learning/Placement Details
	<p>There are no formal arrangements for work-based learning and/or placement opportunities currently embedded into the programme. However, students can opt to undertake a more business or contemporary issue-focused project and this may be in conjunction with a previous or current employer or a different organisation.</p>
19	Attendance and Engagement
	<p>In line with the Student Attendance and Engagement Procedure, Students are defined as academically engaged if they are regularly engaged with timetabled teaching sessions, course-related learning resources including those in the Library and on the VLE, and complete assessments and submit these on time.</p> <p>For this programme, academic engagement equates to the following:</p> <p>Attending all scheduled teaching (online and on-campus), engaging with non-classroom-based activities such as the resources on the VLE (Aula) at least once weekly, and submitting assessments.</p>

20	Equality and Diversity
	<p>The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code.</p> <p>The programme takes account of the diverse group of students joining the programme. To ensure we meet these needs are clear rules and expectations of how students should be treated: fairly and equally. Negative attitudes will be challenged and there is the creation of an all-inclusive culture for staff and students. Students with special needs will receive the study materials in advance of the class.</p>

Programme structures and requirements, SCQF level, term, module name and code, credits and awards ([Chapter 1, Regulatory Framework](#))

21	Learning Outcomes (Maximum of 5 per heading)
-----------	---

SCQF LEVEL 11 - Postgraduate Certificate (PgCert)	
Learning Outcomes	
Knowledge and Understanding	
A1	Demonstrate knowledge and a critical appreciation of the core areas of international accounting practices and contemporary developments in corporate reporting, management accounting, corporate finance and global financial markets.
Practice - Applied Knowledge and Understanding	
B1	Be able to apply relevant accounting and finance knowledge and understanding to a wide range of complex situations.
B2	Be able to apply practical knowledge and understanding in a wide range of accounting and financial scenarios.
Communication, ICT and Numeracy Skills	
C1	Analyse a wide range of complex data appropriately using a range of numerical skills.
C2	Perform complex and technical calculations in relation to accounting and finance subject areas.
C3	Use a wide range of ICT applications to support and enhance decisions at a high level.
C4	Undertake critical evaluations on a range of numerical and graphical management accounting data.
Generic Cognitive Skills - Problem Solving, Analysis, Evaluation	

D1	Deal with complex issues both systematically and creatively, whilst making rigorous and robust judgements sometimes in the absence of complete data.
D2	Critically and systematically analyse and review financial and relevant non-financial information to identify information gaps and be able to give decisions based on this analysis.
Autonomy, Accountability and Working With Others	
E1	Exercise autonomy, initiative and originality in problem-solving.
E2	Take ownership of work and act autonomously in planning, decision-making, and implementation of various tasks and activities at a professional level.
E3	Identify own learning needs and proactively address these needs.
E4	Work effectively in peer relationships
