16	<p><b>General Overview</b></p> <p>The Criminology and Criminal Justice programme offers an opportunity to study criminological theory, research and policy alongside a strong emphasis on process and institutions. It develops a comparative knowledge and understanding of Criminology theories, and Criminal Justice with attention to Scotland, the United Kingdom, Europe, and beyond, including the global south. It is a four-year, full-time programme and involves the study of concepts, theories, structures, organisations, processes and practices involved with the prevention, investigation and prosecution of crime, the workings of the criminal law and criminal court system and the treatment of people with convictions. It is based on progressive levels of study, and at Level 7 and Level 8 introduces students through research-led teaching by staff in Criminology and Criminal Justice, to the key concepts and theories in criminology and criminal justice. For example, at Level 7 students will study the differences between deviant and criminal behaviour, the foundations of criminal law, and the way in which the criminal justice system operates; and at Level 8 the theoretical underpinnings for understanding crime and justice, the nature of policing, and contemporary theoretical perspectives on crime such as gender, power, race and class. Additionally, students are taught core research methods at Levels 7, 8, and 9 where students will have the opportunity to meet and collaborate with students enrolled on other social science related programmes within the School. At Levels 9 and 10 there are a range of modules that allow students to develop their own specialised areas that draw from and reflect staff's research interests in Penology, Policing, Youth Justice, Gangs, Working in Criminal Justice, Global Security, Victimology and Comparative Criminal Justice.</p> <p>Students have the opportunity to apply during level 8 of their studies to specialise at level 9 by taking the Criminal Justice (Policing) specialism which entails students taking the Policing Communities and Crime Investigation modules at Level 9, and completing a policing related dissertation in level 10. Information relating to how to secure a place on the specialism is discussed with the level 8 cohort each year. At the end of the degree, student who successfully complete all of the policing modules will exit with either a BA Criminal Justice (Policing) or BA (Hons) Criminal Justice (Policing) award.</p> <p>All students are assigned a personal tutor who can support and provide advice throughout the period of study related to personal, pastoral or academic issues. The programme also provides opportunities for students to study abroad through established Erasmus partnerships in Malta and Slovenia (subject to Erasmus continuing). There are further opportunities for experiential learning with the offer a biennial field trip to one of three Universities in the United States of America on a rotational basis.</p> <p>Overall, the design of the Criminal Justice programme seeks to provide students with an in-depth knowledge and understanding of the nature of crime, criminal justice and criminal justice systems, locally, nationally and globally, and with a range of key transferrable critical, analytical and evaluative skills.</p> <p><b>Progression Routes and/or Further Study</b></p> <p>Criminology and Criminal Justice students have the potential to enter employment in a variety of contexts including: youth justice, the police, as police officers, as part of the 'civilian' support staff, or as part of the office of the Police Investigation and Review Commissioner; the Prison Service; the Criminal Courts Administration and/or the Fiscal service; Local Authorities where jobs that are specifically related to criminal justice are a further potential graduate destination with growing opportunities in areas such as restorative justice; Community Justice related opportunities exist in</p>
----	--

areas including community safety and working with people with convictions, victims and witnesses; the Scottish Justice Department; and numerous youth/criminal justice services such as SACRO, Young Scot and Youth Link.

Relating to further study, students have in the past gone on to take postgraduate studies in Criminology, Law, Applied Social Sciences, Social Work, Policy Analysis, Global Security, Teaching, and other related disciplines. For those students interested in pursuing an academic career path, an achieved honours classification of 2:1 and above would normally make a student eligible to pursue postgraduate study either at UWS or elsewhere.

### **Learning, Teaching and Assessment Strategies**

The learning, teaching and assessment framework is aligned with the University's Strategic Plan and with AdvanceHE's (formerly HEA) Framework, to develop an assessment strategy that promotes learning and is fit for purpose, that embraces effective feed forward and feedback practices that are innovative and promote excellent teaching and learning experiences. For example, there are opportunities to study abroad through the earlier noted field trips. Furthermore links exist to support students in undertaking applied/work-related learning opportunities as part of their undergraduate studies, including through our level 10 'Working in Criminal Justice' module where students combine criminal justice work or volunteering with their academic studies. There are a range of learning and teaching methodologies including inquiry-based and blended learning to support students in becoming autonomous learners through the development of independent learning skills.

Teaching is research-led with all members of staff having experience of working and publishing in the field of Criminal Justice. Research active staff have worked with a diverse range of agencies on a number of projects including topics such as institutional and school violence, community policing, reducing reoffending, public protection, victimisation, youth gangs and organised crime, issues affecting refugees, support for former armed forces personnel, international crimes such as genocide and terrorism. A number of agencies linked with these areas of research also provide support through guest lectures and/or support for student research projects. The knowledge gained from this external engagement and practice are embedded in the curriculum.

Our assessments vary in form - formative and summative - and include essays, seminar presentations, poster presentations, short answer questions, case studies, on-line assessments, critical article reviews, and mock practical exercises such as mooting / mock trials and replication of a children's panel. The programme offers a variety of assessments in order to encourage student learning and development and provide students with a range of transferrable skills and competencies. Pedagogical philosophy underpins the programme's learning, teaching and assessment strategy by:

- Providing a diverse range of learning and assessment options
- Providing the opportunity for students to develop a range of communication styles and skills - oral and written
- Embedding both formative and summative forms of assessment
- Providing opportunities for students to develop digital literacies
- Supporting student collaborations - internally and externally - to develop critical thinking, independent learning, and bridge the gap between acquired academic knowledge and applying it to contemporary Criminal Justice issues
- Encouraging reflection on key graduate attributes/transferrable skills

	<ul style="list-style-type: none"> <li>Facilitating awareness of the complex and contested ethical issues in Criminal Justice</li> </ul> <p>Consequently the degree programme utilises a number of learning and teaching methods including lectures, seminars, group work, and workshops. It encourages students to become independent and autonomous learners throughout their degree programme and at Level 10 the Dissertation module provides the opportunity for an extended period of independent study.</p> <p>All modules have their own Aula site (virtual learning environment), which support students with a range of learning resources, including discussion boards, on-line tests, and where appropriate video-clips.</p> <p>The BA (Hons) Criminology and Criminal Justice programme board, divisional board, and the school of Education and Social Sciences annual monitoring process evaluate all of the learning and teaching practices adopted by the programme, for example through the module evaluation process, with alterations and improvements made every year.</p>
<b>17</b>	<b>Graduate Attributes, Employability &amp; Personal Development Planning</b>
	<p>The programme is fully aligned with institutional priorities around the development of graduate attributes and with the institutional policy on personal development planning. The mapping of programme and module learning outcomes and employability-integrated assessment ensures the visibility of graduate attributes, employability and citizenship competencies. Personal development is embedded and explicitly signposted in the curriculum, with students provided with regular opportunities to capture and evaluate progression and development, stimulating reflection, self-regulation and a more constructive engagement with employability. It is recognised that personal development planning is an essential component of lifelong learning and continuing and professional development. To support this activity, all students are provided with access to personal development planning tools and enabled to develop a personal eportfolio across the programme.</p> <p>Within the School of Education and Social Sciences, there is a focus on embedding employability skills and personal development planning in delivered modules. In particular this is carried out within the core research methods modules through their applied nature, the optional level 10 module 'working in criminal justice' and the level 10 Dissertation which encourages the development of key independent learning and employability skills.</p> <p>On the BA (Hons) Criminology and Criminal Justice programme, learning outcomes and the design of assessment strategies ensure that, in addition to the development of academic subject-based knowledge, students also develop key personal transferable skills that will enhance their employability. Encouragement is given to students to reflect upon their own learning and/or achievement and to engage in planning for their personal education and career development throughout their studies. As part of the University's commitment to the development of PDP, Personal Tutors support students in developing self-awareness of the key skills and knowledge that are acquired in the course of learning, and in becoming effective, independent and selfdirected learners.</p> <p>A range of electronic tools provide the opportunity for students to record and showcase their academic and personal achievements in developing their curriculum vitae.</p> <p>The BA (Hons) Criminology &amp; Criminal Justice Programme maps fully on to the 'I am UWS' strategy. This institution-wide strategy ensures that students, upon completing their studies will</p>

	<p>be Universal, Work-ready, and Successful in an academic, personal, and professional sense. The full 'I am UWS' graduate map for the programme can be found on the BA (Hons) Criminology &amp; Criminal Justice programme Aula site which all students of the programme have access to.</p>
<b>18</b>	<p><b>Work Based Learning/Placement Details</b></p> <p>We have a number of partnerships, and several members of the team have excellent working relationships, with institutions in Europe, USA and elsewhere. Our international strategy is in line with the university's ambitions as laid out in the Global Reach Enabling Plan.</p> <p>We are also actively engaged with external organisations such as SACRO, Victim Support Scotland, Community Services Glasgow, SPS and Police Scotland to deliver work-related opportunities for students, in line with the University's Education Enabling Plan, AdvanceHE's (formerly the HEA's) strategies for Embedding Employability, and Student Engagement through Partnerships. We further seek to develop volunteer opportunities or to gain applied work-related learning experience as part of their degree studies through modules such as the level 10 'work related learning module'. Further to this, the Level 10 Dissertation Module is designed to permit students to consider undertaking an applied research project with/for an external agency if planned and permission given by the organisation in question. This is especially the case for those students registered on the policing specialism at level 10, as they will conduct research related to policing and may have the opportunity to carry out a project agreed with a single point of contact at Police Scotland.</p> <p>Work-related learning and skills development are embedded within a large number of modules on the BA (Hons) Criminology &amp; Criminal Justice programme and associated Policing specialism as previously noted.</p>
<b>19</b>	<p><b>Attendance and Engagement</b></p> <p>In line with the <a href="#">Student Attendance and Engagement Procedure</a>, Students are defined as academically engaged if they are regularly engaged with timetabled teaching sessions, course-related learning resources including those in the Library and on the VLE, and complete assessments and submit these on time.</p> <p>For the purposes of this programme, academic engagement equates to the following:</p> <p>All full time students (part-time and distant learning students should check with their programme leader for any queries) are required to attend all scheduled classes and participate with all delivered elements of the module as part of their engagement with their programme of study. Consideration will be given to students who have protection under the appropriate equality law. Please refer to UWS Regulations, Chapter 1, 1.64 – 1.67, available at the following link: <a href="http://www.uws.ac.uk/current-students/rights-and-regulations/regulatory-framework/">http://www.uws.ac.uk/current-students/rights-and-regulations/regulatory-framework/</a> Please note that some individual modules may have specific engagement and attendance requirements that deviate from the standard approach, and all students should familiarise themselves of the requirements for each module they enrol on through module descriptors, module handbooks, and module VLE sites.</p>
<b>20</b>	<p><b>Equality and Diversity</b></p> <p>The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: <a href="#">UWS Equality, Diversity and Human Rights Code</a>.</p>

	<p>Please detail any specific arrangements for this programme. This should be considered and not just refer the reader to the UWS Equality and Diversity policy.</p> <p>Aligned with the overall commitment to equality and diversity stated in the Programme Specifications, the module supports equality of opportunity for students from all backgrounds and with different learning needs. Using Aula, learning materials will be presented electronically in formats that allow flexible access and manipulation of content (part-time and distant learning students should check with their programme leader for any queries). The module complies with university regulations and guidance on inclusive learning and teaching practice. Specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and regulations. The University's Equality, Diversity and Human Rights Policy can be accessed at the following link: <a href="http://www.uws.ac.uk/equality/">http://www.uws.ac.uk/equality/</a></p> <p>Our partners are fully committed to the principles and practice of inclusiveness and our modules are designed to be accessible to all. Where this module is delivered overseas, local equivalent support for students and appropriate legislation applies.</p>

## Footnotes for option modules

Note that to enable graduation with the BA Criminology & Criminal Justice or BA Criminology & Criminal Justice (Policing), or for progression to level 10, students must accumulate at least 120 credits during this year of study, 90 of which must come from Level 9. So students must not choose any more than one optional module that is categorised as Level 8. In addition, student are not permitted to retake an option when they have already completed that module i.e. if a student completed Criminal Justice Issues in Level 8, they must not choose this again in Level 9 of the programme.

Footnotes for option modules

Note that to enable graduation with the BA (Hons) Criminology & Criminal Justice, students must accumulate at least 120 credits during this year of study, 90 of which must come from Level 10. So students must not choose any more than one optional module that is categorised as Level 9. In addition, student are not permitted to retake an option when they have already completed that module i.e. if a student completed Youth Justice in Level 9, they must not choose this again in Level 10 of the programme. Please note that choosing an option from level 9 is ONLY permitted if there is no timetable clash with the other level 10 scheduled modules, and that no timetable alterations can be made to

accommodate level 10 students should there be such a clash, in that event level 10 students must choose another module that does not clash.
