Undergraduate Programme Specification

Session	2026/27	**Last Modified**	
Named Award Title	Professional Graduate Diploma in Education		
Award Title for Each Award	PGDE (Primary) PGDE (Secondary) then one (or two for dual qualifications) of the following: • Art and Design • Biology with Science • Chemistry with Science • English • French • German • Mathematics • Physical Education • Physics with Science • Spanish		
Date of Approval			
Details of Cohort Applies to	2026-27		
Awarding Institution	University of the West of Scotland	**Teaching Institution(s)**	University of the West of Scotland
Language of Instruction & Examination		English	
Award Accredited by		General Teaching Council for Scotland (GTC Scotland)	
Maximum Period of Registration		4 years https://www.uws.ac.uk/media/6350/uws-authorised-interruption-guidance-notes.pdf	
Duration of Study			
Full-time	1 year	**Part-time**	N/A
Placement (compulsory)	18 weeks: school experience placement		
Mode of Study	☒ Full-time ☐ Part-time		

Campus	☒ Ayr ☐ Dumfries	☒ Lanarkshire (Primary Only) ☐ London ☐ Paisley	☐ Online / Distance Learning ☐ Other (specify)
School	Education and Social Sciences		
Divisional Programme Board	Education		
Programme Leader	E Wotherspoon		

Admissions Criteria

Candidates must be able to satisfy the general admission requirements of the University of the West of Scotland as specified in Chapter 2 of the University Regulatory Framework together with the following programme requirements:

SQA National Qualifications:

English at SCQF Level 6 (e.g. Higher) at C or above and

Mathematics at SCQF Level 5 (e.g. National 5) at C or above

Acceptable alternatives to the qualifications listed above are given in the Memorandum on Entry Requirements to Programmes of Initial Teacher Education in Scotland (GTC Scotland, 2024), and are published on the UWS website/prospectus.

Or GCE

English Language and English Literature at C or above and

Mathematics at C or above

Or SQA National Qualifications / Edexcel Foundation

N/A

Other Required Qualifications/Experience

All pathways: Applicants must have graduated with a degree from a UK university or an equivalent degree qualification from a higher education institution outside of the UK. A degree validated by a higher education institution in the United Kingdom or a degree of an equivalent standard from an institution outside the United Kingdom is required.

Primary pathway: When demand for places significantly exceeds the number of places, priority is given to applicants who have attained a 2.1 or 1st class Honours degree. However, all applicants who hold an Honours or an Ordinary/Pass degree, and have appropriate experience, will be considered for interview. Maths (at SCQF Level 5) and English (SCQF Level 6) requirements must

be held, not pending.

Secondary pathways: The degree should contain 80 SCQF credit points relevant to the teaching qualification or qualifications being studied. Of the 80 credit points, 40 must have been studied at SCQF Level 8 or above. Details on the required credit points for each secondary subject are given in the Memorandum on Entry Requirements to Programmes of Initial Teacher Education in Scotland (GTC Scotland, 2024).

All pathways: To gain entry to the programme, candidates must successfully undertake selection activities prior to being offered a place. Candidates who are offered a place on this programme must apply for and obtain membership of the Protection of Vulnerable Groups Scheme to proceed on the programme.

Further desirable skills pre-application

All pathways: Further information on desirable skills and experience pre-application is provided in the Memorandum on Entry Requirements to Programmes of Initial Teacher Education in Scotland (GTC Scotland, 2024).

Primary pathway: Experience of working with young people in a primary classroom and up-to-date knowledge and understanding of primary education in Scotland will enhance an application to this programme.

Secondary pathway: Experience of working with young people in a secondary classroom and up-to-date knowledge and understanding of secondary education in Scotland will enhance an application to this programme.

General Overview

The overall aim of the programme is to develop individuals with a range of transferable graduate skills who will attain the Standard for Provisional Registration (GTC Scotland, 2021) and thus be eligible to apply for provisional registration with GTC Scotland and entry to the Teacher Induction Scheme. In accordance with the relevant benchmarks, graduates demonstrate the attributes, knowledge and skills encompassed by the following core areas:

Being a Teacher in Scotland

The core professional values defined as Social Justice, Integrity, and Trust and Respect which are integral to, and demonstrated through, all professional relationships, thinking and actions, and all that teachers do to meet their professional commitment; enacting teacher professionalism in everyday practice, both within and outwith the educational establishment; Learning for Sustainability as a whole-school commitment; and teacher leadership of and for learning.

Professional Knowledge and Understanding

The knowledge and understanding of the relevant areas of the curriculum, including contexts for learning to fulfil their responsibilities in literacy, numeracy, health and wellbeing, and interdisciplinary learning; relevant educational principles and pedagogical theories; the importance of research in informing professional practice; the principal features of the education system; and their own professional responsibilities within the learning communities in which they will teach.

Professional Skills and Abilities

The ability to design, deliver and assess effective, appropriate and stimulating programmes of work across all areas encompassed by Curriculum for Excellence and suitable for young people at all stages of primary or secondary school in a variety of settings, environments and circumstances; to engage all learners and develop rights-respecting relationships; and to use reading, research and feedback from a range of sources to inform effective self-evaluation and maintain a reflective record of impact of professional learning on self and learners and development culminating in an Initial Professional Development Action Plan.

The programme encourages students to engage in lifelong learning, study and enquiry, and to appreciate the value of education to society. It assists students to develop the skills required for both autonomous practice and team-working. The Standard for Provisional Registration is part of a suite of professional standards published by GTC Scotland. Individuals obtaining provisional registration aim to progress to full registration and are then expected to continue to develop their expertise through appropriate and sustained career-long professional learning (GTC Scotland, 2021).

Typical Delivery Method

Delivery of our primary pathway is across two campuses: Ayr and Lanarkshire.
Delivery of our secondary pathway is on one campus: Ayr.

The programme, therefore, incorporates a combination of face-to-face and online synchronous and asynchronous learning. Students on either campus should expect to travel to other campuses for some learning activities where combining cohorts across pathways is required or where specialist facilities can only be accessed on a particular campus. In addition, some activities (e.g. outdoor learning) may take place at other contexts for learning and these details will be shared with the relevant students during the programme.

In all modules on the PGDE programme, we take an authentic, best-practice and forward-looking approach to learning activities and assessment. There is a strong emphasis on situated learning and real professional scenarios. We are committed to interactive learning and the small number of learning activities that are purely transmission of information are and normally pre-recorded. All learning activities are aligned to the relevant aspects of the professional standards. Individual, group or tutor-led reflection is required throughout. Learning activities develop 21st century skills such as communication, collaboration, digital skills, creativity and critical thinking.

The programme adopts a model where teaching and learning will be primarily face-to-face with some online work that is either synchronous (live online at a specific time) or asynchronous (off campus independent work). Lectures, tutorials, workshops and use of the virtual learning environment (VLE), employing a range of learning and teaching methodologies including group work, problem-based learning, student presentations, online tutor/student-led discussions, and resources such as subject-specific equipment, interactive whiteboards, laptops and the outdoors, will be used, as appropriate, to develop student learning.

Student handbooks and other material made available at the start of the programme give more detailed information on the particular learning and teaching methodologies, and combinations of these methodologies, to be used for timetabled student sessions. This clarifies for students both their expectations for timetabled (synchronous and asynchronous) sessions and their expectations for the overall balance of learning and teaching methodologies to be used during the programme.

Ongoing formative assessment across the programme provides feedback to students on their developing thinking on educational issues and professional abilities.

Summative Assessment

All pathways: The PGDE Applied Education Studies module is offered at SCQF Levels 10 and 11. In both cases, the assessment takes the form of a presentation of 10-12 minutes and a reflective essay of 3,000 words but the assessment criteria are differentiated to match the learning outcomes for the two levels. All students are enrolled on PGDE Applied Education Studies at L10 and the module encourages criticality in order to support students considering L11. Students are given full explanation of the different standards of work required by the two levels, and in March they are asked to make a decision at which level they will submit. By this time in the programme, students have completed two substantial periods of school experience and have received feedback on other assessments; these experiences enable students to make an informed decision. The pass mark at L10 is 40%; the pass mark at L11 is 50%.

Primary pathway: The PGDE(P) Primary Curriculum module assessment takes the form of a test in literacy and numeracy, and an assignment on Health and Wellbeing. Recommendation 5 of the Donaldson (2011) review of teacher education, *Teaching Scotland's Future*, states that "the threshold established at entry should allow for weaknesses to be addressed by the student during the course. A more demanding level should be set as the prerequisite for competence to teach". In response to this recommendation, the pass mark for each element of the test (literacy AND numeracy) is 50%. The pass mark for the assignment is 40%. All categories of the assessment must be passed.

Secondary pathway: The PGDE(S) Subject Studies module assessment takes the form of an assignment on assessment in secondary schools. The assignment has three sections - assessment theory in relation to summative assessment, professional enquiry in formative assessment and reflection on practice. The pass mark for the assessment is an overall grade of 40%.

All pathways: In compliance with the requirements of the GTC Scotland, 50% of the programme, a total of 18 weeks, is devoted to school experience in different schools and at different stages. Placement handbooks set out the requirements and expectations of school experience, including the evidencing of practice in a placement portfolio. Following formative assessment of the first period of school experience, the subsequent placements are assessed summatively by the partner school and the visiting University tutor. In addition to written feedback, students receive Satisfactory or Unsatisfactory grades for each of the eight benchmark areas of the Standards for Provisional Registration. Assessment of the module is on a pass/fail basis, dependent upon satisfactory or unsatisfactory performance in school. The overall grade for each benchmark area is awarded jointly by the partner school and the University tutor.

Any additional costs

Students should be equipped with a laptop to enable access to a range of learning materials in the University and the production of teaching and learning resources and completion of portfolio documentation on school experience placement. Students require access to the internet to engage with learning materials on the virtual learning environment and maintain the placement portfolio on the OneDrive.

All students will need to register on the PVG Scheme, managed and delivered by Disclosure

Scotland. Division administrators share information about the application process and students should be prepared to cover the cost of their PVG.

In addition to tuition fees and living expenses, students on the PGDE will incur some additional costs not covered by their tuition fees, such as for specialist equipment, study materials, graduation, and membership of relevant organisations.

Students should expect and be prepared to cover the costs associated with travelling to campus and to placement. In some circumstances, the University will contribute to excess travel costs whilst on school experience placements. More details on the process and eligibility for this will be shared at the beginning of the programme.

If students are using their own cars to travel to placement, they must confirm with their insurance providers that they are appropriately insured, as some providers may require business class insurance to be in place.

Secondary subject specialists will share details of any materials that students must purchase (e.g. Physical Education kit) with those students directly.

Graduate Attributes, Employability & Personal Development Planning

The programme is designed to consolidate and further develop students' range of graduate skills and attributes that are transferable to other areas of study and professional employment, including:

- knowing how to access and apply relevant research findings;
- practising in a range of professional contexts, which include a degree of unpredictability (culturally aware);
- communicating effectively, both orally and in writing, with a range of audiences (digitally literate);
- engaging in professional dialogue with peers and senior colleagues (collaborative);
- undertaking critical analysis, of professional practices;
- justifying personal opinions by referring to appropriate evidence from a range of sources (research-minded);
- reflecting on and acting to improve the effectiveness of their own practice (analytical; resilient);
- adopting an enquiring approach to professional practice, demonstrating some originality and creativity in finding solutions to professional issues;
- exercising autonomy and initiative in professional activities;
- working with others and, at times, taking a leading role;
- and dealing with complex ethical and professional issues in accordance with current professional and/or ethical codes of practice (alignment with UWS Graduate Attributes in parentheses)

Ongoing reflection is central to the programme, which aims to develop in every student the professional qualities and capabilities of a reflective practitioner. Although the PDP process is embedded within the School Experience modules and is linked to evaluation on placement, students are encouraged to reflect on personal and professional learning throughout the PGDE year. Students maintain a record of progress, aligned to the Standard for Provisional Registration. The process culminates in the production of an Initial Teacher Education Profile, completed at the

end of the PGDE year.

Upon graduation and provisional registration with GTC Scotland, graduates are eligible for entry to the Teacher Induction Scheme. This scheme is administered by GTC Scotland, in partnership with the Scottish Government Learning Directorate, and provides a guaranteed one-year post to every eligible student.

Work Based Learning/Placement Details

In compliance with the requirements of GTC Scotland, 50% of the programme, a total of 18 weeks, is devoted to school experience, occurring in each school term. To assure placement partners that students are appropriately prepared to undertake periods of school experience, and in accordance with module and programme handbooks, any student whose attendance has fallen below the 80% minimum requirement for academic modules during each period of University learning (and who is therefore deemed to be unprepared for a period of school experience) is normally required to undertake a period of further preparation (on campus) when other students are on placement.

UWS Regulations, Chapter 1, 1.48 also applies to periods of school experience and it should be noted that any student whose attendance has fallen below the 80% minimum requirement may be deemed not to have met the professional requirements of the programme as accredited by GTC Scotland and, therefore, may not be eligible for assessment on that placement. In this case, the required school experience placement would normally be completed in the autumn term following the academic year of study. We follow guidance issued by GTC Scotland, as required.

Attendance and Engagement

In line with the Student Attendance and Engagement Procedure, students are academically engaged if they are regularly attending and participating in timetabled on-campus and online teaching sessions, completing asynchronous online learning activities, using course-related learning resources, and completing assessments and submitting these on time.

For the purposes of this programme, academic engagement equates to the following:

Students are academically engaged if they are attending and participating in all timetabled programme activities including on-campus and online teaching sessions, asynchronous online learning activities and school experience placements, using course-related learning resources, and completing assessments and submitting these on time.

In accordance with module and programme handbooks, any student whose attendance has fallen below the 80% minimum requirement for a module could be withdrawn from and given a re-attend decision for that module. To assure placement partners that students are appropriately prepared to undertake periods of school experience, unsatisfactory attendance (below 80%) in an academic module within the learning block prior to a placement may prevent progress to placement, or result in withdrawal from the programme, as a student would be deemed not to have met the professional requirements of the programme as accredited by GTC Scotland.

Equality and Diversity

The University's Equality, Diversity and Human Rights Procedure can be accessed at the following link: UWS Equality, Diversity and Human Rights Code.

The programme supports equality of opportunity for students from all backgrounds and with

different learning needs. In all modules on the PGDE programme, we take an authentic, best-practice and forward-looking approach to learning activities and assessment. There is a strong emphasis on situated learning and real professional scenarios. We are committed to interactive learning and the small number of learning activities that are purely transmission of information are normally pre-recorded. In workshops, which utilise classrooms, and other facilities as appropriate, the outdoors and the VLE, main methodologies include collaborative working, problem-based learning, real-world tasks, research-based learning, placement-based learning, enquiry-based learning, micro-teaching, student presentations, online tutor/student-led discussions, walking, experiments, play/games. All learning activities are aligned to relevant aspects of the professional standards. Individual, group or tutor-led reflection is required throughout. All of the above is planned to support and enhance the inclusion of all students.

Using the VLE, learning materials are presented electronically in formats that allow flexible access and manipulation of content. The programme complies with University regulations and guidance on inclusive learning and teaching practice. Specialist assistive equipment, support provision and adjustment to assessment practice will be made in accordance with UWS policy and regulations.

Level 9 **Criteria for Progression and Award** ***Please refer to UWS Regulatory Framework for related regulations***

SCQF LEVEL 10 Learning Outcomes (Maximum of 5 per heading)	
Knowledge and Understanding	
A1	Demonstrate knowledge that covers and integrates most of the principal areas, features, boundaries, terminology and conventions of education.
A2	Demonstrate a critical understanding of the principles and evolving theories of curriculum design, contexts for learning and cross-curricular links.
A3	Demonstrate detailed knowledge and understanding of the relevant curriculum (secondary or primary), current educational issues and effective approaches to teaching and learning.
A4	Demonstrate knowledge and understanding of the ways in which teaching and learning are developed, including a range of established techniques of professional enquiry.
A5	Demonstrate knowledge of how to access and apply relevant findings from education research.
Practice - Applied Knowledge and Understanding	
B1	Design, deliver and assess effective, appropriate and stimulating programmes of work across all areas encompassed by Curriculum for Excellence and suitable for learners at all stages of early years and primary education or secondary education (BGE and Senior Phase).
B2	Use skills, practices and materials which are specialised, advanced, or at the forefront of classroom practice in a variety of settings, environments and circumstances.
B3	Practise in a range of professional contexts, which include a degree of unpredictability and specialism, and maintain a safe, caring and purposeful learning environment within these contexts.
B4	Apply the principles of assessment, recording and reporting, and use the results of assessment to evaluate and improve teaching, and to improve standards of attainment across the curriculum.
Communication, ICT and Numeracy Skills	
C1	Communicate effectively, using a variety of media including digital technologies, to promote and develop positive relationships, and to stimulate pupils and achieve the objectives of lessons.
C2	Communicate effectively with peers, learners, colleagues and others in school.
C3	Communicate and report effectively, both orally and in writing.
C4	Engage in professional dialogue with peers, university tutors and school colleagues.
C5	Construct and sustain reasoned and coherent arguments about educational matters and professional practices.
Generic Cognitive Skills - Problem Solving, Analysis, Evaluation	
D1	Undertake critical analysis, evaluation and synthesis of ideas, concepts, information and issues in educational contexts.
D2	Justify a personal stance on educational issues by referring to appropriate evidence from a range of sources.
D3	Reflect on and act to improve the effectiveness of their own practice and contribute to the processes of curriculum development, school development planning and meeting the

	educational needs of school communities.
D4	Adopt an enquiring approach to professional practice, demonstrating some originality and creativity in finding solutions to professional issues.
D5	Develop record of personal professional learning and development into an Initial Professional Development Action Plan.
Autonomy, Accountability and Working with Others	
E1	Exercise autonomy and initiative in professional activities.
E2	Work effectively under guidance in a peer relationship with qualified practitioners and other agencies and individuals.
E3	Work with others and, at times, take a leading role in bringing about change, development and new thinking relating to an aspect of education (primary or secondary).
E4	Deal with complex ethical and professional issues in accordance with current professional and/or ethical codes of practice and in accordance with the needs of schools and wider communities.
E5	Demonstrate achievement of all aspects of the Standard for Provisional Registration.

Footnotes for Core Modules

Secondary students enrol on PGDE(S) Subject Studies and if they are undertaking a dual qualification are switched to PGDE(S) Subject Studies (Dual) in May prior to the School

Assessment Board.

All students enrol on PGDE Applied Education Studies. In term 2, students are given the option to undertake the mode assessment at Level 10 or L11. Should they choose to submit at L11, they are withdrawn from PGDE Applied Education Studies and enrolled on PGDE Applied Education Studies (L11).

Level 10
Criteria for Award
Please refer to UWS Regulatory Framework for related regulations

Student progress is monitored on an ongoing basis. To graduate, students are required to pass each assessed component for their pathway, gaining a total of 120 credits.

Secondary pathways:

For students on secondary pathways, 120 credits must come from the modules below:

PGDE(S) Subject Studies or PGDE(S) Subject Studies (Dual)

PGDE(S) School Experience

PGDE Applied Education Studies or PGDE Applied Education Studies (L11)

Primary pathways:

For students on primary pathway, 120 credits must come from the modules below:

PGDE(P) Primary Curriculum

PGDE(P) School Experience

PGDE Applied Education Studies or PGDE Applied Education Studies (L11)

A student failing a coursework component is normally permitted to have one further attempt to obtain a pass in the outstanding assessment. In the case of failure on school experience, a student

is normally permitted to have only one further attempt to reach a satisfactory standard.

The PGDE programme is conferred on students who have satisfactorily met the programme requirements. The PGDE programme is an example of professional programmes where a School Board of Examiners can be given the power to terminate the programme progress of a student when a student's continuation on placements is judged to be unacceptably damaging to the interests of placement partners (e.g., schools and their pupils during school experience). Student handbooks provide further details.

Regulations of Assessment

Candidates will be bound by the general assessment regulations of the University as specified in the University Regulatory Framework.

An overview of the assessment details is provided in the Student Handbook and the assessment criteria for each module is provided in the module descriptor which forms part of the module pack issued to students. For further details on assessment please refer to Chapter 3 of the Regulatory Framework.

To qualify for an award of the University, students must complete all the programme requirements and must meet the credit minima detailed in Chapter 1 of the Regulatory Framework.

Combined Studies

There may be instances where a student has been unsuccessful in meeting the award criteria for the named award and for other more generic named awards existing within the School. Provided that they have met the credit requirements in line with the SCQF credit minima (please see Regulation 1.21), they will be eligible for a Combined Studies award (please see Regulation 1.61).

For students studying BA, BAcc, or BD awards the award will be BA Combined Studies.

For students studying BEng or BSc awards, the award will be BSc Combined Studies.
